Java, J2EE, Java Script, AngularJS, JSTL, XML, Shell Scripting, GUI Development Technologies, GWT Web Application Development Servlets, Java Server Pages (JSP), Java Server Faces

PROFESSIONAL EXPERIENCE

Senior Java Developer

Admaxlocal Llc - April 2015 – Present

Key Deliverables:

- Designed and developed a MongoDB (NoSQL) based external Restful API for exposing the functionality of an existing saas platform to clients in an agile work environment using the web client.
- Involved in updating the saas platform to support the Bing AdWords API and integrating the changes with Google AdWords API.
- Managed product development/implementation using AWS cloud infrastructure.
- Wrote unit and integration tests to test all the desired functionality using JUnit (TDD), Testing, Mockito, and Wiremock.
- Documented the external API using enunciate and modified the auto-generated docs with custom CSS to match corporate website and design.
- Created Spring MVC - rest based JSON services, used rest template for making a client call to JAX-RS web services.
- Developed the UI layer using Struts, JSP, Javascript, JQuery, Node.js, JSTL, XML and XPath, XML big data parser technology and Jwebunit.

Senior Java Developer

ABC Corp - 2010 – 2015

Key Deliverables:

- Performed complex programming assignments requiring an advanced aptitude for established programming standards, methods, and best practices.
- Acquired and interpreted the business requirements, created functional specifications and determined the most efficient/appropriate technologies.
- Performed the analysis of business models, logical specifications and/or customer requirements to design and build business solutions utilizing multiple technologies.
- Contributed to, reviewed and approved the technical designs of software solutions.
