

JESSICA CLAIRE

100 Montgomery St. 10th Floor
(555) 432-1000 - resumesample@example.com

SUMMARY

- More then 20 years of experience as a Team lead and Web/Application Developer , using c# , vb.net , SQL server.
- More then 5 years of experience developing application using Python.
- Experienced with full software development life - cycle, architecting scalable platforms, object oriented programming, database design and agile methodologies.
- Experience with JSON based REST API.
- Experience in architecting enterprise level application.
- Experience in deploying and developing solution for cloud using Azure.
- Successfully designed and delivered secure cloud solutions for CONED.

TECHNICAL SKILLS

- Azure cloud architecture
- SQL Server ,Tableau ,SSIS packages
- Python, C# , vb.Net , Java Script

EXPERIENCE

06/2009 to Current **Python/Azure/C#/Vb.net Lead or Architect**

Assurant – PR

- Conducted full lifecycle software development in multiple software environments using python , c# , vb.net , Azure
- Coordinated with project managers across multiple initiatives to align development timelines, plan testing and work with client representatives.
- Built decoupled and service-oriented middleware software and platforms using python,c# and vb.net
- Administered application stacks and executed performance tuning to optimize session performance by eliminating performance bottlenecks.
- Identified, researched and evaluated innovative machine learning technologies, explaining details to coworkers.
- Participated in meetings, code reviews, demos, design sessions, and project retrospectives.
- Designed and deployed machine learning models into product stack in support of product development.
- Established scalable automated processes to develop, validate and implement machine learning models.
- Facilitated integration of machine learning services into technology infrastructure.
- Handled root cause analysis, implementing corrective actions when necessary.
- Mentored new engineering and production team members.
- Debugged and troubleshoot production tooling and equipment.
- Created additional targeted business solutions in high demand areas for **disaster recovery and cloud backup**.
- Migrated customers to latest virtual servers to azure cloud and storage technologies to improve performance.
- Assisted with new hardware and software deployments, system upgrades and virtual environment upgrades.
- Increased performance and scalability by sizing solutions to meet system workload requirements.
- Researched and implemented new technology platforms to support development initiatives.

01/2007 to 06/2009 **Senior Software Engineer**

Leviton – San Jose, CA

- Designed front-end application using Asp.net and c#
- Modified existing software systems to enhance performance and add new features.
- Designed user-friendly software interfaces to simplify overall management.
- Documented technical specifications and project testing methods for future reference and other assignments.
- Performed functional, non-functional, regression and performance tests for updated systems.
- Drafted detailed design objectives and developed architectural and system design documents.
- Met with stakeholders, contractor product teams and customers throughout system development lifecycle.

02/2005 to 01/2007 **Project Lead**

Planned Systems International – Mary Esther, FL

- Spearheaded project meetings with team members to discuss ongoing, planned and recently completed projects.
- Maintained close connection with project personnel to quickly identify and resolve problems.
- Kept project teams on-task with proactive control of budgets, schedules and scopes.
- Improved quality, functionality and cost by investigating alternate materials for product development.
- Delivered design recommendations, updates and design results to internal and external clients.
- Collaborated with development, QA and IT operations staff to enhance software productivity.
- Modified existing software systems to enhance performance and add new features.
- Designed user-friendly software interfaces to simplify overall management.
- Communicated highly technical concepts using easy to understand terminology.

01/2000 to 02/2005 **Software Developer**

Infrasoft Technologies And Dewsoft Solution – City

- Performed functional, non-functional, regression and performance tests for updated systems.
- Logged and implemented development tasks based on system requirements and documented approaches.
- Recommended and executed plans to improve development tools and processes.
- Designed websites, portals and large-scale web applications for multiple clients.
- Built layouts according to customer parameters using HTML5 and CSS3.
- Built custom SOAP APIs to suit unique customer needs.
- Contributed back-end development experience and collaborated on multiple APIs crucial to functionality.
- Repaired issues causing site crashes, resulting in elevated uptime and increased sales.
- Implemented backup system to protect site from outages, data loss and data corruption.

EDUCATION AND TRAINING

B.E in Computer Science: Computer Science And Programming

D.Y.Patil College - Maharashtra

Diploma: Computer Technology

Bhausaheb Vartak - Maharashtra
