EXPERIENCE

SENIOR SQL DATABASE DEVELOPER

Dallas, TX

05/2015 – present

- Mentor and assist other SQL Developers on their technical responsibilities
- Provide development effort estimations
- Interact with database and ETL developers to design and develop new functionality
- Great at writing SQL. Familiarity with some of the more powerful SQL constructs and an appreciation of performance issues - how to write performant queries and also how to investigate and tune existing performance problems
- Assist in the development of security features
- Develop and maintain SSRS reports for the various business applications
- Create database design documentation at architectural and functional level

MS SQL DATABASE DEVELOPER / ADMINISTRATOR

Chicago, IL

06/2011 – 12/2014

- Perform complex database administration assignments essential to the production and development of DBMS applications, including but not limited to: database analysis, design and development, security support, performance monitoring and tuning
- Trace down and troubleshoot database problems
- Work with Full-stack Developer to implement and monitor integrations between various business systems utilizing XML, SOAP and REST APIs
- Work with DevOps Engineer and IT to set up and maintain database servers on-premise and in the cloud
- Monitor performance and managing parameters to provide fast responses to front-end users considering back-end organization of data
- Install and test new version of DBMS
- Maintain Company Data standards

SQL DATABASE DEVELOPER

Philadelphia, PA

05/2006 – 04/2011

- Work with other SQL developers to develop and extend data warehouse modeling to provide flexible and efficient access to information
- Perform tests and conduct code reviews with other team members to make sure your work is resilient, elegantly coded, and effectively tuned for performance
- Manage and contribute to all aspects of application development including functional and technical specifications, design, development and production support
- Lead project to consolidate SSRS servers, and improve report development/deployment workflow
- As part of an agile/Kanban team working with the develop team on release scripts and deployments
- Commit to continuous improvement in methodologies as applied to database design and development
- Performs a variety of tasks. May provide consultation and knowledge transfer

EDUCATION

UNIVERSITY OF SAN FRANCISCO

Bachelor's Degree in Computer Science

SKILLS

- Ability to work under pressure, on multiple assignments, with strong attention to detail
- Strong written and communication skills; ability to articulate complex ideas clearly and effectively
- Strong database design experience including detailed specifications
- Exhibit strong initiative, leadership, and accountability
- Strong attention to detail
- Excellent organizational skills with attention to detail
- Strong knowledge of network and server troubleshooting
- DB2 knowledge is a great
- Good time-management skills and the ability to work to tight deadlines
- Full working knowledge of operating systems and software including but not limited to Linux, Javascript, Python
