## SUMMARY

Adept Junior Developer with over 6 years of experience. Proficient in ETL, BI development, Hadoop, SQL Server, Informatica and UNIX scripting with a proven record of enhancing business operations through meticulous database management and data analysis. Awarded 'developer of the year' for exceptional developmental contributions.

## EXPERIENCE

2017 - 2019

New York City, New York

Database Developer

IBM

Worked on database design and creation for large scale data warehousing solutions.

- Collaborated with a team of 5 to create a fault-tolerant data storage solution for large clients, improving their data retention capability by 50%.
- Utilized Informatica PowerCenter to build ETL workflows, reducing data integration time by 40%.
- Part of a team that migrated legacy Teradata BTEQ scripts to Informatica mappings, improving data accessibility by 35%

2015 - 2017

New York City, New York

Software Developer

Oracle

Developed and maintained software applications using Java and UNIX scripting.

- Created 5 data-intensive applications leading to a 20% reduction in processing time.
- Applied UNIX scripting to automate system processes, resulting in a 60% reduction in repetitive tasks.
- Participated in code reviews, leading to identification and resolution of over 100 bugs.

2013 - 2015

New York City, New York

Business Intelligence Analyst

Microsoft

Designed and developed BI reports and dashboards using MS Office tools and SQL Server.

- Designed over 20 interactive dashboards, leading to a 30% improvement in business decision-making.
- Collaborated with the ETL team to ensure consistent and accessible data flow for BI reporting.
- Successfully translated business user needs into BI technical requirements on 50+ occasions.

## STRENGTHS

### Problem Solving

Adept at utilizing programming constructs to solve complex business problems, leading to a 30% increase in efficiency

### Detail Orientated

Detail-oriented mindset fostered while debugging vast lines of ETL code, greatly reducing errors in projects.

### Communication

Demonstrated ability to effectively convey technical information to non-technical stakeholders, improving project delivery speed by 20%

## EDUCATION

2011 - 2013

New York City, New York

Master's degree in Computer Science

Columbia University

2007 - 2011

New York City, New York

Bachelor's degree in Information Technology

New York University

## SKILLS

MS Office

Excel

ETL Development

Informatica

UNIX Scripting

Data Warehouse Management

Hadoop

SQL Server

Java

BI Development

## CERTIFICATION

### Certified Informatica Developer

A course certified by Oracle, focusing on ETL operations using Informatica

### UNIX Shell Scripting Certification

A course certified by IBM, focusing on automating tasks using Unix shell scripting
