

First Last

Cloud DevOps Engineer

DevOps Engineer with 9+ years of experience building, testing, and maintaining infrastructures and tools to allow for the speedy development and release of the software. Key accomplishments include:

- Reduced power and rack utilization by spearheading a software upgrade that improved IT processes.
- Implemented a virtualization technique using OpenVZ/KVM, reducing Physical Nodes from 60 to 6.
- Led a significant migration project of the company's key data science pipelines to the cloud (AWS), saving \$50,000 in yearly infrastructure costs.

WORK EXPERIENCE

Resume Worded, New York, NY

Cloud DevOps Engineer 07/2019 – Present

- Delivered resiliency as a comprehensive product within 5 Cloud Infrastructures.
- Gained deeper insight into 17 applications and infrastructure behavior with monitoring and observability.
- Participated in RW Admin duties for the RW main workspace with 76K users.
- Implemented build and deployment scripts using Maven as build tools in Jenkins to move from one environment to 25 other environments.

Growthsi, San Francisco, CA

Systems Administrator and Software Engineer 05/2017 – 10/2019

- Increased IT support from 35 workstations and servers to over 115 devices.
