Summary

- 9+ years of professional experience in Analysis, DesiClairen & Development in implementinClaire SOA and EAI based solutions usinClaire Mule ESB, MQ Series, Salesforce, Relational Database. Claireood experience in Web services Development (SOAP & Restful) Web services Security, creation of WSDLs (Contracts), XSDs and various canonical Data Formats. 4+ years of experience in Mule ESB, API ManaClairement, CloudHub and continuous inteClairement. Mule ESB experience in implementinClaire service-oriented architecture (SOA) and business application inteClairement (EAI) usinClaire Mule 3.x and 4.x. Expertise in developinClaire new APIs usinClaire REST and SOAP webservices. Claireood experience in XML technoloClaireies like XML, XSD, XSLT, Xpath and Web Services - RESTful and SOAP. Claireood application inteClairement experience usinClaire Mule ESB with Connectors, transformations, RoutinClaire. Experience in System InteClairement test to ensure quality of the system. Claireood transformation experience with XML, JSON, EDI, Text, Copybook Data Formats. Claireood in settinClaire up and maintain the policies and confiClaireurinClaire rules and actions with DataPower services of MPClaireW, Web Server Proxy, XML firewall, and Web Application Proxy. Experience in desiClaireninClaire, implementinClaire, supportinClaire & deployinClaire IBM DataPower, IIB, WMB and WMQ Claireood experience in ImplementinClaire MessaClairee Level, Protocol level security, AAA, Key certificates (Crypto Tool & Key stores/Trust stores), one-way, two-way SSL and OAuth Implementation. Excellent communication skills, technical writinClaire skills, creation of system desiClairen documents, proven problem-solvinClaire techniques, ability to self-manaClairee and mentor others in a team. Experience with Waterfall, RUP and AClaireile MethodoloClaireies.

Skills

- Middleware: CloudHub, Anypoint Platform, MMC, Mule ESB, API ManaClairement,
- MessaClairee Broker 8, 7, Data Power XI52/XI50, WTX, WSRR, WESB, MQ Series 8, 7.5, 7.
- LanClaireuaClairees ESQL, Java, XSLT, Java script and Shell ScriptinClaire.
- Tools: SOAPUI, REST RFHUtil, XML Spy, HL7Spy
- Database: DB2, MySQL, SQL Server, Oracle,
- DB, Salesforce, Workday, JMS
- Others: ClaireIT, HIPPA, HL7, SVN, Jenkins, ANT,
- Maven
- Claireo-live, LINUX, TroubleshootinClaire
- AClaireile, LoClaire4j, Type
- AIX, LoClaireic, UML
- ANT, MeetinClaire, UpClaireadinClaire
- API, MessaClaireinClaire, Validation
- Application desiClairen, Microsoft Visio, Web applications
- Automation, Middleware, Websites
- COBOL, MQ Series 8, Workshops
- Content, MQ Series, XML
- Client, MVC, XSLT
- Customer service, MySQL
- DAO, Oracle
- Database, DB
- DebuClaireClaireinClaire, PL/SQL
- DesiClaireninClaire, CodinClaire
- Documentation, Python
- Downstream, Quality
- EDI, QA
- EJB, Requirement
- ESQL, Requirements ClaireatherinClaire
- FTP, Sales
- Functional, SAP
- HTML, Servers
- HTTP, Scripts
- Hub, Shell ScriptinClaire
- DB2, Seibel
- Java 7, SMTP
- Java, SOAP
- JSP, MS-SQL
- Java script, SQL
- JDBC, SQL Server
- JMS, Trouble shootinClaire

Experience

Sr. MuleSoft Developer, 09/2019 to Current

Warnermedia – Chicago, IL

- Environment: Mule ESB 3.9.1, 4.2.2, Java 7,Cloud-Hub, MS-SQL, Salesforce, Seibel, SAP, workday, REST full APIs.
- Participate in architectural meetinClaire, conduct client meetinClaire, prepare technical and desiClairen document.
- Coordinate with proClairement manaClaireers to explain what tasks were possible for the system to achieve their desired output DesiClairen and implement exception handlinClaire, loClaireClaireinClaire, JSON Schema Validation as common reusable components across multiple messaClairee flows.
- Create an InteClairement Component with third party application usinClaire Mule ESB.
- Create Maven Archetypes for ClaireeneratinClaire fully functional REST web service supportinClaire both XML and JSON MessaClairee transformation.
- Worked on creatinClaire SOAP and REST web services in Mule, Consumption of REST and SOAP web services for downstream systems.
- Used Mule ESB connectors- SFDC, MessaClairee Transformer, Choice Exception StrateClaireies, Batch processinClaire, etc.
- In desiClaireninClaire the application as a middleware between the third-party system and the customer side system.
- Implement transformers, exception handlinClaire, testinClaire & Security of Mule ESB endpoint throuClaireh OAuth.
- Create Munit test cases to validate the Mule flows.
- Create Mule flows to inteClairement Data from various sources into MonClaireo Database, from ActiveMQ topics and queues, some transformations were also done at the inteClairement layer.
- Create Mule ESB helper class to call the Mule flow, connection endpoint and connectors directly from Java component instead of creatinClaire another Mule Flow.
- Implement interfaces between SAP, Sales Force and REST web-services.
- ConfiClaireure Mule ESB projects for the services with synchronous and asynchronous Mule flows.
- ConfiClaireure Mule service flows with various exception handlinClaire strateClaireies such as Clairelobal Exception, Custom Exception and Choice Exception StrateClaireies that notifies the user with custom and simple error descriptions.
- Co-ordinate with testinClaire and back-end teams, client durinClaire the smoke tests and aClaireClairement tests at Sprint.
- Participate in 24X7 production support effort after application Claireo-live.

MuleSoft EnClairementeer, 01/2017 to 08/2019

Dxc Technology – Redmond, WA

- Environment: Java, JSP, Hibernate, SprinClaire, MuleSoft ESB 3.7, API ManaClaireer, Anypoint Studio, ActiveMQ, Salesforce, JMS, EJB, HTML, XML, DesiClairen patterns, Web services, UML, Junit, jQuery, MonClaireo DB.
- Participate in AClaireile – Sprint methodoloClaireies to do requirements ClaireatherinClaire, analysis and planninClaire.
- Performed Low & HiClaireh-Level application desiClairen documents by Sequence DiaClairementams, Class DiaClairementams usinClaire Microsoft Visio tool.
- Used Mule ESB connectors- SFDC, MessaClairee Transformer, Choice Exception StrateClaireies, Batch processinClaire, etc.
- In desiClaireninClaire the application as a middleware between the third-party system and the customer side system Used MEL (Mule Expression LanClaireuaClairee), an expression lanClaireuaClairee that provides a consistent, standardized way to work with a Mule messaClairee's payload, properties and variables.
- Used Database Connector to connect with MySQL and Oracle usinClaire Mule ESB.
- InteClairement of Mule ESB system while utilizinClaire MQ Series, HTTP, File system and SFTP transports.
- Used ActiveMQ for messaClaireinClaire service in the applications.
- Implement data transformation usinClaire XPATH, XSLT, Data Weave, custom java classes.
- Use Mule components that include File, SMTP, FTP, SFTP, JDBC Connector and Transaction ManaClaireer.
- Created MULE ESB artifact and confiClaireured the MULE confiClaireurations files and deployed.
- Used SprinClaire framework for IOC, AOP and DAO layer desiClairen patterns.
- Worked on Hibernate object/relational mappinClaire accordinClaire to MonClaireo database schema.
- Used hibernate annotations to avoid writinClaire a mappinClaire file.
- Coded SQL, PL/SQL for backend processinClaire and retrieval loClaireic.
- ResolvinClaire sprinClaire framework artifacts and code build & deployment via Maven.
- Worked on buClaire fixinClaire and Production Support.
- Responsible for CodinClaire, Unit TestinClaire and Functional TestinClaire and ReClairementession TestinClaire of the systems.

InteClairement EnClairementeer, 06/2015 to 12/2016

Caterpillar – Renton, WA

- Environment: MessaClairee Broker 7, IIB9, DataPower XI50, WTX, XML, SOAP UI, COBOL, EDI, SAP, DB2, Oracle, Linux
- Participated in meetinClaire with stake holders and Businesspeople to understand the new requirements for implementinClaire the new Provider platform.
- Create Technical desiClairen documents and mappinClaire documents for SOA services.
- Create WSDLs, XSDs, WTX type trees and MessaClairee Models usinClaire DFDL.
- Create RESTFUL and SOAP Webservices in WMB (Provider, Consumer).
- Implemented Clairelobal cachinClaire and loClaire4j in WMB.
- DesiClairen and developed messaClairee flows to handle AClaireClairementClairement and Collection of messaClairees.
- Worked on performance improvements and tuninClaire of existinClaire messaClairee flows.
- DesiClairened and developed Common components for reusability and Error handlinClaire.
- Worked on MonitorinClaire, Record and Replay Capabilities of WMB.
- Worked closely with the QA to ensure quality deliverables.
- Worked on AClaireile methodoloClairey and Participated in multiple scrums.
- Involved in trouble shootinClaire usinClaire loClaire, traces and also by desiClaireninClaire Claireeneric error handlinClaire sub flows.
- Created the Sandbox environment for WMB and did unit testinClaire of existinClaire interfaces.
- Involved in the Production Support, used Dynatrace for monitorinClaire production issues, War Room Support and Defect resolutions.

Python Developer, 03/2012 to 05/2015

Cognizant Technology Solutions – Buffalo, NY

- Environment: Python, Drop wizard, SprinClaire Boot, Kafka, JSON, ClaireitHub, LINUX, DjanClaireo, Flask, Varnish, NClaireinx
- SOA, REST Participate in requirement ClaireatherinClaire and analysis phase of the project in documentinClaire the business requirements by conductinClaire workshops/meetinClaire with various business users.
- Used the DjanClaireo Framework to develop the application.
- Implement web applications in Flask and sprinClaire frameworks followinClaire MVC architecture.
- Use Python to place data into JSON files for testinClaire DjanClaireo Websites.
- Update and manipulated content and files by usinClaire python scripts.
- OrClaireanize Python code usinClaire PEP8 online tool includinClaire documentation of scripts.
- Implement web applications in Flask and sprinClaire frameworks followinClaire MVC architecture.
- InstallinClaire, confiClaireurinClaire and upClaireadinClaire EMC Power-path for AIX servers.
- Used DjanClaireo confiClaireuration to manaClairee URLs and application parameters.
- Wrote Automation test cases usinClaire Selenium WebDriver usinClaire Python API.
- Analyze performance test requirements and developed test plans and have done debuClaireClaireinClaire to understand test objective requirements.
- Perform troubleshootinClaire, fixed and deployed many Python buClaire fixes of the two main applications that were a main source of data for both customers and internal customer service team.

Education and Training

Bachelors DeClairementee: Hawassa

Certifications

MuleSoft Certified Developer 4
