

Christa Scott

DEVOPS ENGINEER

SUMMARY

Analytical, committed, persistent individual and reliable team member. Continuously learning and acquiring new knowledge and skills. Experience in building different projects using a wide range of technologies. Performing well in different environments in onshore and distributed teams.

TECHNICAL SKILLS

Core Computer Skills

- Server administration, troubleshooting on Linux/Unix based systems.
- Automation of continuous integration, delivery, and deployment - Jenkins, Ansible, Bash, Git.
- Building scalable applications using Docker and container orchestration - Kubernetes.
- Working knowledge of AWS - ECS, EC2, RDS, S3, ElasticSearch, ELB, Route53.
- Creating infrastructure as a code - CloudFormation.
- Building analytics and monitoring solutions with visualisation - Nagios, Icinga2, PRTG, Grafana.

EXPERIENCE

DevOps Engineer

in-Winds Jun 2017 - Present

- Work closely with developers to build their development pipeline and deploy code to various environments.
- Participate in deploying, automating, maintaining and managing AWS cloud based production system, to ensure the availability, performance, scalability and security of production systems.
- Develop and maintain monitoring, and alerting tools
- Perform maintenance and troubleshooting of continuous integration systems including build and deployment used across multiple environments.
- Participate in the Agile DevOps design, development, testing, and release of new capabilities and features.
- Proactively communicate and coordinate with multiple project teams

Linux System Administrator

Tecno Rim May 2016 - May 2017

- Optimising server performances. Troubleshooting, determining the root cause and working on solutions and implementation.
- Participate in technical research and development to enable continuing innovation within the infrastructure domain.
- Production operations (code deployments, upgrades, system patches)
- Involved in designing of Linux server environments for developers and testers, supporting them, and documenting procedures for IT support.
- Working closely with developers on developing and supporting new features
