Work History

- 01/2021 to Current

Senior Magento Developer
Amuse – City, STATE

 - Collaborated on all stages of systems development lifecycle from requirement gathering to production releases.
 - Planned and developed interfaces that simplified overall management and offered ease of use.
 - Gathered and defined customer requirements to develop clear specifications for project plans.
 - Provided dramatic increases in overall site stability and provided solutions for long-term problems affecting D2C transactions.
 - Integrated with a large number of third-party vendors through bespoke API interfaces.
- 05/2017 to 12/2020

Lead/Senior Magento Developer
Cricut – City, STATE

 - Optimized and developed the existing storefront to a very high level of performance. Decreased individual page loads by as high as six seconds, down to roughly 1 second, and overall site performance by three seconds on all pages. Drove development towards best practices and pushing the limits of our technology stack.
 - Worked with numerous teams, each specializing in different technologies, to bring a coherent cross-platform experience to our customers. Optimized the integration of our home-made platform with the Magento platform.
 - Provided stability and 100% uptime during high-volume periods. Lead a team of developers and oversaw the weekly release cycle of a Scrum/Agile development process. Communicated with all departments in the organization to make our shopping experience as effective and painless as possible.
 - Architected the migration and lead the implementation of the migration process from Magento 1 to the Magento 2 platform. Trained experienced PHP developers in the specifics of the Magento platform and its optimization.
- 09/2016 to 05/2017

Magento/Web Developer
Eystudios – City, STATE

 - Developed exceptional websites suited to individual customer needs. Created, troubleshooted, and maintained custom extensions and modules to increase the out-of-the-box functionality of the Magento 1 and Magento 2 platform.
 - Learned the entirety of the Magento 2 platform on the job and have reached a level of extreme qualification and competence with the platform.
 - Migrated several websites from other platforms to Magento 2 including Magento 1, BigCommerce, WooCommerce, and custom-created PHP platforms. The process included conversion of data and functionality into Magento data as well as extensions.
 - Created and maintained new websites to client specifications, working in close order with other developers as well as designers and client relations specialists to provide the optimal website for client needs.
 - Spoke with clients during kick-off calls and made data-driven recommendations to them based on their sales goals, time frame, and budget. Conveyed high-level technical concepts into digestible language for non-technical persons. Often served as preferred point of contact for new technical requests and questions.
- 05/2014 to 03/2016

Magento/Web Developer
Vaperite – City, STATE

 - Troubleshooted and resolved web application issues escalated from customer support and other departments with a 100% success rate. Assisted in the monitoring and reporting on website traffic and performance. Improved reliability of supply chain software, systems, database and order processing.
 - Developed and managed project plans while providing status updates to management. Served as operating system expert, providing technical support for entire organization.
 - Redesigned the retail website to CEO's specifications. Used CSS, HTML, and PHP 5 to customize the website.
 - Updated and maintained 3dcart wholesale website. Performed daily updates and changes to the retail website including the addition of new products and management of extensions.
 - Customized a lightweight PHP-based application for label indexing and management.
 - Coordinated technical efforts between IT, POS, and Product managers to achieve improved efficiency.
 - Modified third-party extensions to improve their functionality with the existing Magento framework.
