## PROFESSIONAL SUMMARY

- 7 Years of extensive experience as a front-end developer with a solid understanding of application design and development.
- Experience in developing User Interface (UI) Applications and professional web applications using HTML5, CSS3, Bootstrap, React.JS, JavaScript, JQuery, AJAX, RWD, JSON, XHTML and XML.
- Experience with Grunt task runner and installed the latest version of libraries with Bower based on running in the Node.JS environment.
- Hands-on experience on the development of the interactive UI one-way data flow, virtual DOM, JSX, React Native components, forms, React router and Redux architecture.
- Responsible for developing the partner Homepages using HTML5, CSS3, JavaScript, React JS, Node JS and JQuery.
- Experience with HTML5, CSS3, Bootstrap3, JavaScript, AJAX, TypeScript, Angular2, React JS, Vue JS, Visual Studio Code, MySQL, GitHub, Agile/Scrum.
- Experience using React JS components, forms, events, keys, routers, animations, and flux concepts.
- Good experience with React JS for creating interactive user interfaces using unidirectional data flow, virtual DOM, and JSX concepts.
- Experience in working with all the different concepts like Vuex, Vuetify, etc. Using Vue JS, a modern JavaScript framework.
- Experience with CSS backgrounds, CSS layouts, CSS positioning, CSS text, CSS borders, CSS borders, CSS padding, CSS tables, pseudo-classes, pseudo-elements, media queries, and Flex Design in CSS and responsive web design.
- Good understanding and extensive experience in developing Single Page Applications (SPAs), Web applications using JavaScript MVC frameworks such as React JS and Vue JS.
- Excellent communication, interpersonal and analytical skills and a highly motivated team player with the ability to work independently.

## WORK HISTORY

### REACT.JS DEVELOPER

03/2021 to CURRENT

#### Motion Recruitment | Kansas City, MO

- Developing web front end interfaces using HTML/HTML 5, CSS3, JavaScript, PHP,XHTML, jQuery, Java, AJAX, JSON, Node JS, React JS, Angular JS, Vue JS, jQuery and Bootstrap
- Developed responsive web design using React Bootstrap to create grids, layouts, and components
- Worked on developing responsive internal application using React JS to collect metrics from users and agents
- Implementation of ReactJS lifecycle methods with modern ES 6 features using Babel and Webpack
- Developed intranet responsive site with React JS
- Experience with ReactJSlifecycle and implementation of these methods in Redux architecture
- Work with React Router to develop SPA for Single Page Applications
- Developed Session beans which encapsulate workflow logic and used Hibernate to access data extensively used Hibernate in data access layer to access and update information in database
- Developed and maintained Single Page Application (SPA) using HTML5, CSS3 and React.JS also developed React components for partner homepages using React.JS
- Used React.JS and JSX to develop functional and stateless components, virtual DOM manipulation props, lifecycle methods, states and events
- Involved in building RESTful API's using Node.JS using REST frameworks such as Redux
- Worked with VUE JS forms, validations, modules, components, statements, controllers, and HTTP requests
- Responsible for Vue.js event delivery and parent-child communication chain
- Used Vue.js to manipulate DOM, handle events, and apply animation effects
- Used Node.JS architectural concepts like event loop, call backs, and event emitters
- Developed UI for SPA development using React JS, Flux/Redux
- Using React JS, you created custom components for data manipulation and displayed data in your company's standard format
- Experience with leading frameworks such as React.js for building high-quality, scalable, and reusable components and front-end solutions
- Environment: HTML/HTML5, CSS2/CSS3, DHTML, XHTML, PHP, JavaScript, Bootstrap, React.JS, REDUX, React Native, Node.JS, JMS, XML, REST, SOAP, EJB, Log4j, JUnit, Jenkins, MongoDB, SQL, jQuery, Node.js, React JS, Redux, Vue Js, AJAX, JSON, DOM, SASS, Soap, Restful API, Agile and Windows.

### REACT/REACT NATIVE DEVELOPER

08/2019 to 02/2021

#### Verizon Communications | Buda, TX

- Involved in Requirements gathering, analysis and design and documentation as application was started from scratch
- Developed Web based and Server side applications using Java 8
- Developed responsive client-side application to integrate with server side using JavaScript, JQuery, Node
- Js , Vue
- Js and Bootstrap
- Developed responsive client-side application to integrate with server side using JavaScript, JQuery, AngularJS, Node
- Js , Vue
- Js and Bootstrap
- Actively involved in developing proof-of-concepts for new proposed applications using React JS
- Experience with ReactJS and experience using React Flux architecture
- Experience with Redux Architecture
- Use Vue.js event delivery and parent chain for parent-child communication
- Worked on multiple components for different course elements player and quiz player using Vue.js and Vuex
- Developed rich and complex Responsive Web User Interface using HTML5/XHTML, JavaScript, CSS3, XML, JavaScript, JQuery, React.JS, Node.JS and Bootstrap
- Developed rich integration for dashboards using React.JS and Virtual DOM
- Involved on React.JS virtual DOM and React views, rendering using components which contains additional components called custom HTML tags
- Used various predefined components from NPM (Node Package Manager), Redux Library and worked using React.JS Components and Stand-alone functions for adding more pages
- Utilized concept called Virtual DOM in React.JS to create in-memory data structure cache, enumerate resulting differences, and then update browser's displayed DOM efficiently
- Used Node.JS to develop backend components, connecting application with other web services
- Used XML parser APIs (SAX) in web service request response data marshaling as well as un-marshalling process
- Created front-end single page applications with HTML5, CSS3, JavaScript, Bootstrap, ReactJS, NodeJS, and MongoDB semantics
- Developed Single Page Application (SPA) using ReactJS that leverages JavaScript ES6 classes and module functionality
- Environment: HTML5, CSS3, JavaScript, React.JS, REDUX, React Native, Node.JS, JMS, XML, VueJS, Vuex, DOM, GitHub, JSON, Agile, Windows.

### REACT/REDUX DEVELOPER

12/2017 to 07/2019

#### Tractor Supply Company | City, STATE

- Designed and developed websites using HTML 5, SASS, React JS, Redux, Flux, Node JS, CSS, Type Script, JavaScript, Bootstrap, Node.js, NPM and Mongo DB
- Developed front-end web applications for global network operations using React JS, Redux, Bootstrap, ES6/Babel, and Webpack
- Created more responsive websites compatible with all browsers and different devices with React JS
- Developed single page responsive website using HTML5, React, Twitter Bootstrap, CSS3, JavaScript and jQuery
- Developed UI using React js, Flux for SPA development
- Used React to work on Redux to handle large amounts of data and improve performance
- Implemented React container and presentation components (possibly as stateless and functional components)
- Implemented stable React components and standalone functionality that can be added to future sites
- Used React JS for templating to speed up compilation and development of reusable components
- Experienced in developing React components
- Worked on Webpack for build and webpack-dev-server for server
- Developed applications from scratch using React Native and Redux
- Created views in JSX and used Flexbox for proper styling
- Created native bridges for iOS and Android to integrate with React apps
- Built stable version of app using ES6 syntax and updating responsive native app regularly
- Work with React JS Virtual Dom and React Views and render in components with additional components called custom HTML tags
- Web package configured to run linters, loupes, pre/post processors, tests, transpires, etc based on build
- Designed and developed dispenser dashboard that displays data from IoT devices and developed site dashboard and its features that allow data to be displayed in charts (C3.Js)
- Unit test React JS application using tools like Enzyme and Cypress
- Environment: HTML5, SASS, Bourbon, Neat, React JS, Redux, Flux, React Native, Node JS, AEM, jQuery, Gulp, Grunt, webpack, JIRA, Jasmine, Karma, Protractor, Maven and Jenkins.

### UI DEVELOPER

09/2015 to 11/2017

#### Mroads | City, STATE

- Developed responsive client-side application to integrate with server side using JavaScript, JQuery, AngularJS, Node Js , Vue Js and Bootstrap
- Used CSS to maintain consistency between screens
- Worked on migration from Angular JS 1.x to Angular2 and implemented new features to improve performance of application
- Developed web-based data visualization by integrating Angular 2 and d3.js suitable for both web and mobile
- Directives and services used to establish communication between components
- Extensive model-driven forms for more control and better validation of user-entered data
- Work with application architects and backend developers on JSON API design
- Responsible for configuring GIT repositories and maintaining version control with GIT
- Applying Angular2 functions such as creating components and binding data using data binding method
- Followed Agile methodology for on time delivery of project
- Environment: Angular 2, JavaScript, D3.js, Restful Web Services, MySQL, Bootstrap 3, GitHub, Node JS, Agile, HTML5, CSS3, Karma, Jasmine

## EDUCATION

### Master of Science | Computer Science

#### Northwest Missouri State University, Maryville

### Bachelor of Science | Computer Science

#### Lovely Professional University, Phagwara
