

Trish Mathers

Entry-Level Data Scientist

Innovative and scientifically rigorous graduate with significant data science internship experience to bring to the table. With a team-oriented attitude, I'm eager to contribute my abilities in quantitative modeling and experimentation to enhance the experience of global Pinterest users.

WORK EXPERIENCE

Niantic

Data Scientist Intern

Seattle, WA | April 2022 - December 2022

- Developed a program in SAS that automated refinement of linear regression models for specific segments of a customer base that saved 22 hours of labor per month.
- Received, cleaned, and prepped data from client using SAS, SQL, and Excel to help data scientists build marketing mix models that resulted in a lift in ROI of 10 basis points.

Seattle University Tutor Center

Statistics and Mathematics Tutor

Seattle, WA | April 2020 - April 2022

- Assessed students' learning to determine learning weaknesses and needs, successfully helping students perform 13% better in algebra, pre-calculus, calculus, and statistics undergraduate courses.
- Met with 30+ students per week through online learning platforms or in a 1:1 setting at the tutor center.
- Scheduled weekly appointments for students, and set schedules for student statistics and math tutors.
- Communicated with professors about curriculum, and submitted reports 2 times per week to maintain up-to-date learning plans for students.

PROJECTS

Fantasy Football Models

- Aggregated and prepped 3 years of fantasy football projection data from 3 independent sources into a MySQL database.
- Created a random forest model in SAS, combining disparate sources into one projection that outperformed the mean absolute error of the next best projection by 15%.

Entertainment Engine

- Aggregated data from IMDB and Rotten Tomatoes, and used k-nearest-neighbors in SAS, constructing an enhanced entertainment selection targeted to reach 15- to 25-year-olds.
- Improved methodologies to save an average of 12 minutes per movie selection and 3 minutes per song selection.

SKILLS

- Programming: SAS (base SAS and Macros), SQL
- Supervised Learning: linear and logistic regressions, decision trees, support vector machines (SVM)
- Unsupervised Learning: k-means clustering, principal component analysis (PCA)
- Data Visualization: Excel, Google Sheets

EDUCATION

B.S.

Mathematics and Economics

Seattle University

September 2019 - April 2023

Seattle, WA

GPA: 3.7

Relevant courses

- Intermediate programming
- Probability & Statistics
- Linear Algebra
- Applied Econometrics
- Game Theory
- Calculus 1-3
