

# JESSICA CLAIRE

100 Montgomery St. 10th Floor  
(555) 432-1000 - resumesample@example.com

## PROFESSIONAL SUMMARY

- Professional experience in **Web Design** and **Developing User Interface** using Technologies like **HTML/HTML5, CSS/CSS3, JavaScript, Bootstrap, JSON, AJAX, RESTful Services, Redux, GIT, SVN, React, Typescript, Webpack** etc.
- Extensive experience with **JavaScript** design pattern, structured JavaScript development and **S.O.L.I.D principles**.
- Used **JavaScript DOM manipulation**, DOM functions, DOM events, DOM collection, and JavaScript event to generate the data result in UI.
- Proficient in developing Single Page Application (SPA) using JavaScript.
- Used **React** concepts like **JSX** (JavaScript Syntax Extension), **components, state, and props**.
- Experience in creating Custom Reusable **React Components Library**.
- Used Middleware, **Redux** in application to retrieve data from Back-End and to perform **RESTFUL services**.
- Experience in working with third party **web services APIs** and Web Services using **AJAX** for Dynamic form generation, Auto completion of forms, and user-validation functionalities.
- Comfortable using **SASS**. Implemented **responsive web design** using **media queries** and **bootstrap**.
- Good experience with **Bootstrap** Grid System and **Media Query** to make **responsive webpages**.
- Experience using the **HTML5 toolset**, adapting to **browser compatibility issues, debugging, and troubleshooting** existing code.
- Used **Jest** and **Enzyme** for mocking functions and writing unit tests.
- Good experience in using **JUnit** for testing, **Git, SVN** for **Version Control**.
- Experience with **Agile engineering practices, Agile scrum, and Agile development methodologies**. (Test driven development, continuous integration, and pair programming, etc.)
- Experience with **CI/CD pipeline** and **DevOps processes**.

## SKILLS

- Software Development
- REST
- Programming
- React

## WORK HISTORY

- 08/2021 to Current    **React Developer**  
**Cognizant Technology Solutions** – Glen Allen, VA  
CVS is the country's biggest operator of health clinics, the largest dispenser of prescription drugs and the second-largest pharmacy-benefits manager. I worked with development team responsible for creating and maintaining 'CVS specialty' website, which allows users to Refill their prescription, order prescriptions online, talk to a pharmacist and other services.  
**Roles and Responsibilities:**
- Involved in the development of programming user interface design and front-end for the web application using **HTML, CSS, JavaScript, ReactJs** and **Redux** as the requirements.
  - Developing and implementing responsive user interface components using React concepts and Reusable Libraries.
  - Extensively worked on **ES5** new features such as arrow functions, classes, iterators, and generators.
  - Used **Media Queries** for the design to be compatible in all devices.
  - Involved in writing application-level code to interact with APIs, Web Services using **AJAX, JSON**.
  - Regular interaction of **Restful API** design calls to populate the UI on the app using get, put, post and delete.
  - Using Git to pull and commit the developed content from/to the **Git** repository.
  - Followed **agile** and **scrum** methodology for the development of the product
- 01/2020 to 05/2021    **Software Developer**  
**Pearson** – Durham, NC  
L.U is one of the fastest growing universities in Texas. I was a part of computer science department as Software developer. I worked as front-end developer for university's contact tracing project, in which users are notified if someone they have come in contact with has been tested positive for covid.  
**Roles and Responsibilities:**
- Implementing website features using Html, CSS, JavaScript, including DOM manipulation and ReactJs.
  - Developed and implemented responsive user interface components using **React** concepts to develop reusable and scalable code.
  - Called the **Restful** web services calls for **POST, PUT, DELETE** and **GET** methods.
  - Implement and execute programming and testing related activities, following best patterns and practices according to guidance from colleagues
  - Worked on **Cross-Browser Compatibility** and tested each & every web application on popular web browsers such as Internet Explorer, Firefox, Safari, Opera and Chrome.
  - Used **React HOC, Redux** to develop user interface.
- 03/2016 to 08/2019    **Software Developer**  
**Perspecta Inc.** – White Sands, NM  
Shivoham Infotech is a Digital Marketing company which provides complete solution for all areas of Human Resource management and Digital Marketing. It also provides Web designing, web maintenance And web hosting.  
**Roles and Responsibilities:**
- Involved in software coding, testing, and debugging for web presentation layer using **HTML and CSS**.
  - Extensively used **Git** for version controlling and regularly pushed the code to GitHub.
  - Understand how websites are built, and then using only **JavaScript and CSS**, add innovative visual, layout, and functionality enhancements to existing customer pages
  - Worked with Jest and Enzyme to write unit tests for JavaScript and React code.
  - Developed a strong understanding of **HTML and CSS**.

## EDUCATION

- 05/2021                    **Master of Science: Computer Science**  
**Lamar University**
- 04/2018                    **Bachelor of Science: Computer Engineering**  
**C.U.Shah University - India**
