## Full Stack Developer

A seasoned Full Stack Developer with 6 years of experience driving performance, reliability and scalability of customer-facing web applications. Effectively led full stack development resulting in 25% faster loading times and improved user experience. Deployed applications to multiple cloud-based production environments, set up and maintained a relational database system, integrated third-party services and created web-based CMSs resulting in quicker information and feature updates.

### WORK EXPERIENCE

#### Full Stack Developer

07/2021 – Present

Jupiter Enterprises

- Led full stack development for a customer-facing web application, resulting in 25% faster loading times and an improved user experience
- Optimized application performance by identifying and refactoring inefficient code, resulting in a 20% increase in speed
- Deployed applications on multiple cloud-based production environments and maintained staging environments for testing, leading to smoother releases

#### Web Applications Developer

03/2019 – 07/2021

Lunar Labs

- Integrated a wide range of third-party services and components like payment gateways, geo-location services, and social media logins
- Created web-based CMSs to enable simplified content management, resulting in quicker updates to site information and features
- Monitored system health, debugged performance issues, and optimized applications using both server-side and client-side techniques

#### Junior Fullstack Developer

02/2017 – 03/2019

Phoenix Venture Partners

- Integrated a wide range of third-party services and components like payment gateways, geo-location services, and social media logins
- Created web-based CMSs to enable simplified content management, resulting in quicker updates to site information and features
- Monitored system health, debugged performance issues, and optimized applications using both server-side and client-side techniques
