

# PETER CONNOLLY

## Senior Java Developer

✉ johndoe@example.com 📍 Fareham

### SUMMARY

Senior Java Developer with extensive experience in full-stack web development and expertise in server-side and client-side JavaScript. Strong skills in software architecture, design patterns, and OOP. Skilled in database optimization and source control usage. Seeking to join a specialist communications technology company to develop and evolve software applications.

### EXPERIENCE

#### Senior Java Developer

2018 - 2022

##### ABC Company

Fareham

Developed and evolved current and future projects for tracking and communications across the globe. Built new reporting, mapping, and visualization tools. Maintained and supported APIs consumed by customers resulting in increased scalability, performance, and reliability of software.

- Designed and developed web applications using Java, Tomcat, Spring, and Maven resulting in increased efficiency and accuracy of software.
- Implemented responsive web frontends with latest technologies including Node.js, ES6, jQuery, React, and Lambda resulting in improved user experience.
- Optimized MySQL queries and schema design resulting in faster and more reliable database performance.
- Utilized effective source control usage with Git and GitHub resulting in efficient and streamlined development processes.
- Used Docker and AWS Services including SQS, Lambda, and DynamoDB to enhance software functionality and scalability.
- Collaborated with cross-functional teams to deliver quality software solutions on time and within budget.

#### Java Developer

2016 - 2018

##### XYZ Corporation

London

Developed and maintained web applications using Java and JavaScript. Designed and implemented database schemas and queries. Improved software performance and user experience through effective debugging and problem-solving techniques.

- Designed and developed RESTful APIs using Java and Spring resulting in enhanced functionality and integration with external systems.
- Built responsive web frontends using AngularJS and Bootstrap resulting in improved user experience.
- Implemented effective caching mechanisms resulting in faster application performance.
- Created and maintained documentation for software development processes and best practices.
- Collaborated with cross-functional teams to deliver quality software solutions on time and within budget.

### STRENGTHS

#### ♥ Problem Solving

Solved complex issues with a 95% success rate.

#### ✦ Collaboration

Worked effectively with cross-functional teams to deliver high-quality products.

#### 📍 Adaptability

Quickly adapted to changing project requirements and learned new technologies.

### SKILLS

Full-stack web development

Java web-app development

Server-side & client-side JavaScript

Responsive web frontend development

Database expertise (MySQL)

Source control usage (Git, GitHub)

AWS Services (e.g. SQS, Lambda, DynamoDB)

### ACHIEVEMENTS

#### ✦ Developing Scalable Web Applications

Designed and developed scalable web applications that handled high traffic and provided optimal user experience.

#### 👥 Mentoring Junior Developers

Mentored junior developers and helped them improve their skills and become productive team members.
