EDUCATION

Cochin University Of Science and
Technology
Cochin • 2008

Bachelor in technology: Computer
science and engineering

PROFESSIONAL SUMMARY

I have experience in multiple SAP projects and will have no trouble leading, planning and executing large SAP implementations. I am comfortable being the central focal point of what is going on around me and is someone who never loses attention to detail and always ensures a high quality of excellence. In my current role I frequently contribute to the development of new ideas and methods. Right now I would like to join a company where empowerment and rewards are the cornerstone of the career development model.

WORK HISTORY

Deloitte - SAP Senior Consultant
City • 05/2008 - Current

- Worked with multiple clients in manufacturing, life science, public sector and utility industry. Currently leading a SAP plant maintenance project for a forklift manufacturer in the US.
- Directed all phases of SAP implementation projects, from project preparation to Go-live and support.
- Developed the conversion strategy for migrating legacy data to SAP, Planned and coordinated the conversion Mock testing cycles, developed the cut-over strategy and facilitated the creation of the cut-over plans
- Directed planning, budgeting, vendor selection and quality assurance efforts.
- Defined clear targets and objectives and communicated them to other team members.
- Monitored timelines and flagged potential issues to be addressed.
- Supervised the work of 15-20 team members in multiple projects, offering constructive feedback on their work performance.
- Coordinated design meetings and decisions across internal departments and teams.
- Implemented a set of comprehensive tracking processes to monitor performance.
- Responsible for weekly/daily FRICEW objects delivery associated with the business required functionality
- Lead change request meetings to take key decisions on scope changes and its impact on overall solution and timelines
- Help the client team set up the support structure post go-live
- Facilitate organizational change management especially in training preparation and schedule
- Set up platform for teams across the globe to collaborate
- Resource planning and estimation

ACCOMPLISHMENTS
