## MY LIFE PHILOSOPHY

---

Working with modern tech stacks at Callibrity has been an incredible learning experience. The collaborative culture and challenging projects have pushed me to become a better developer.

## SUMMARY

---

Enthusiastic and experienced Java Software Developer with 5+ years of full-stack development experience. Highly skilled in Java, Git/GitHub, SQL, JavaScript frameworks, and Agile. Proven track record of successfully solving complex problems and delivering quality software solutions. Excited about the opportunity to contribute to Callibrity's mission and work with modern technologies.

## STRENGTHS

---

### 🚀 Leadership

Led cross-functional teams in the successful delivery of complex projects, demonstrating strong leadership skills, effective communication, and the ability to motivate and guide team members. Developed and implemented agile development methodologies resulting in increased productivity and improved project outcomes.

### 🏆 Problem-Solving

Proactively identified and resolved complex technical challenges, leveraging a strong analytical mindset and in-depth knowledge of software development best practices. Developed innovative solutions resulting in improved system performance, enhanced user experiences, and increased cost savings for clients.

### ✏️ Continuous Learning

Passionate about staying up-to-date with the latest technologies and industry trends. Actively pursued professional development opportunities, including certifications and courses, to expand technical expertise and bring valuable insights and fresh ideas to projects.
