CAREER OVERVIEW

I am a experienced computer programmer with expertise in web-based development and design. I am seeking for a position as a software engineer.

QUALIFICATIONS

- Javascript & JQuery
- HTML & CSS
- PHP
- C
- Java
- General programming
- Web application development
- Responsive web design
- Website maintenance

TECHNICAL SKILLS

Javascript & jQuery	Veteran	2 years	Recent
HTML & CSS	Veteran	3 years	Recent
PHP	Familiar	1 year	Recent
C	Familiar	2 year	Recent
Java	Familiar	1 year	In half year

WORK EXPERIENCE

01/2014 to 04/2014 **Front-end developer**

Apex Systems – Bloomington, IL

I got this job as a part-time internship with CPT application. Badger Innovations is a start-up company designing and developing websites for small businesses. During the intern period I joined a developing team, working together with developers to finish 3 complete websites. My proficiency in HTML and CSS significantly speed up the work flow of our team. I learned a lot about javaScript developing tricks, especially Ajax. I also got more experience about server-side scripts like PHP. This internship helped me understanding better about the needs and thoughts of the clients, and team working with other developers. I consider this internship a valuable experience in my career.

06/2013 to 07/2013 **Front-end Developer**

Apex Systems – Boulder, CO

I interned at Hangzhou Huizhi Technology Corporation during my summer break in 2013. I participated in a small project group of 4 people to develop a business calendar application, which was a plug-in for the company's information management system. In the group, I designed and coded the interface of the application, and implemented basic front-end functionality using Javascript. I also worked with other developers on synchronizing data between the application and database.

EDUCATION AND TRAINING

2016

Bachelor of Science: Computer Sciences

University of Wisconsin - Madison - Madison, WI

* Applying for Computer Sciences and Computer Engineering double major.

PORTFOLIO

Web Design

- Otakism (<http://blog.otakism.org>): My personal blog based on Wordpress. I create the theme for this site.
- Rakugaki (<http://rakugaki.me>): My experimental portfolio. This site is completely hand-coded and its every pixel is carefully designed.

Web Development

- UWCourseHelper (<http://mincho.org/courseInfo>): This is a web application aims to provide better online academic experience for UW students. I team up with other 3 students (one of them is a developer) to design and implement this project. My job include the entire front-end functionalities, integration between front-end and back-end and server setup and maintenance.
