PROFESSIONAL SUMMARY

- I am passionate about working with data and would like to apply my experience as a Data Analyst & Database developer to derive valuable insights
- Client-focused Technical Data Analyst cum Database Developer with more than 5 1/2 years designing and development associated to Database/Data warehouse and BI applications, achieving high client satisfaction.
- Excellent understanding of Data Warehouse, SQL concepts and ETL concepts. Proven background improving process quality, providing system automation recommendations and strategies to manage solutions and data efficiently.
- Strong knowledge in Agile Methodology of project implementation. Good interpersonal skills;
- I am result passionate and have the curiosity and zeal to learn new technologies and take on new challenging tasks.
- Team Dynamics, collaboration and model of learning and sharing that aids overall team development.
- Strong team player and proven ability to perform multiple roles.
- Was involved in various phases such as Requirements Gathering, Software development, unit & integration testing, final deployment preparation, Go-Live phase involving hand over and post implementation support.

SKILLS

- Data Analysis, Data Warehousing, Data Solutions.
- BI Application development. SAP Applications. Agile.
- SQL, ETL, and Reporting.
- Database: SQL Server2005/2008 R2, Oracle 10g, Oracle 11g;
- Reporting: Vendavo 8.1,SSRS 2008 R2, Business Objects. •
- Programming Languages: C++, C, UNIX Scripting, Python - basics.
- ETL: IBM Infosphere Data Stage V8.1-8.7, MS SSIS 2008.
- Database designTechnical specifications creation
- Proven Analytic skills
- Excellent problem-solving abilities
- Excellent diagnostic skills

WORK HISTORY

08/2011 to 03/2013 **ETL Developer**

Abt Associates – Rockville

- De-beers | ETL Developer and Reporting Dec 2011 to April 2013 Forevermark, Data Archiving Management – FDI Project aimed to conceptualize and develop several ETL packages and reports using the Microsoft Business Intelligence Suite.
- Key responsibilities included:
- Data Warehousing, project scoping, requirement gathering, analysis, effort estimation, ETL design, development, testing, implementation and production support.
- Handled the full life cycle of Integration and Reporting Services from Development to Deployment of Scripts, Packages and Reports.
- Responsible for Design, development and Implementation of Master and Child packages and job sequencing methodology.
- Database Backup, Schedules, Linked Servers and Restoration of Database. • Predominantly worked on the ETL tool and Database – SQL scripts, queries, designs, stored procedures and functions.
- Responsible to develop and implement complex workflow and mappings in ETL Packages.
- UNIX Shell Scripting.
- Involved in direct interaction with Customer for production support and requirements gathering for enhancements.
- Enhancement of Reports using Report Designer, BI – Development Studio, SSRS R2.
- Proposed technical feasibility solutions for new functional designs and suggested options for performance improvement of technical objects.

04/2013 to Current

Technical Data Analyst and Database Developer

Chevron Corporation (through Vendor L&T Infotech) – City

Summary: I develop interfaces and perform data analysis to help the Business to make better pricing decisions thereby to increase the company's revenue at a Global level.

- Worked through this Project as a Data Lead for two successful yearly releases that were delivered in a timely manner without compromise on quality.
- Known to have established a strong relationship not just within the team but also across 5 other teams across the organization through collaboration.
- Part of the special core project team - Involved in Project Planning, Requirement Analysis and Design discussions with the Business that primarily drives the direction of the project.

The following are some of the key activities/duties that I get involved for the Project:-

- Build and maintain SQL scripts, indexes, and complex queries for data analysis and extraction.
- Planning, design, and implement application database code objects, such as transformation Stored Procedures(Adhering to best practices and standards).
- Manage the project schema in our data warehouse used by our pricing application.Perform extensive data analysis across multiple systems to uncover data issues and drive changes for resolution.
- Collaborate with the Solution Consultants and Business Analysts to help the Business to identify their needs and discuss solution options.
- Focus on analysis and problem solving related activities by dealing with different types of data and the relationships among data elements within the application (Dashboards).
- Draft and prepare standard and/or ad-hoc reports by coordinating with clients to determine their research needs.
- Release coordinator - Database related deployment activity associated with our application.Load Active Deal Load files through the User interface and also provide analysis on the load statistics.
- The Primary contact and responsible for the Data used in the Pricing Application.
- Established compatibility with third party software products by developing program for modification and integration.
- Coordinated with systems partners to finalize designs and confirm requirements.
- Consistently met deadlines and requirements for all production work orders.
- Supervised and provided direction for six technical direct reports regarding database activities.
- Trained junior and senior members of IT team regarding Project Process, data work flow and database related activities.
- Independently worked in creating and managing the Project Schema that transforms/manipulates the data for the Pricing Application.

EDUCATION

2011

Bachelors of Engineering: Electronics and Communication

Anna University - India - Chennai

ACCOMPLISHMENTS

- *Analysis and Development*
Resolved core issues through the changes in the transformation, data house-holding processes and daily round-trip database synchronization. Set new standards having over 98% data accuracy.
- *Performance Management*
Successfully deployed complex end-to-end business intelligence solutions that delivered business value to functional organizations. Facilitated effective working relationships between client, partners and project teams throughout project lifecycles.
- *Problem Resolution*
Responsible for support and development of Project Production. Served as advocate for end-users, performing tests and problem analysis for the Data used in Project application.
- *Process Improvement*
Collaborated with IT Operations teams to ensure smooth work flow and efficient project operations.

CERTIFICATIONS

- Microsoft Certified Technology Specialist - SQL Server 2008.
- IBM Certified Solution Developer – Info sphere Data stage V8.5 (IBM).
- Oracle Certified SQL - Oracle Database 11g.
- Certified - Chinese for Beginners – Peking University (Coursera)
- Diplôme d'études en langue française (DEL F - International French proficiency test).
