- Working on various version control systems like **GIT**, Build tools like Maven, Ant Continuous Integration Tools such as Jenkins, containerization tool Docker, Configuration management tool Chef, and Shell scripting.
- Strong experience in **Branching and Merging** strategies.
- Good knowledge of using **Maven** scripts to automate code compilation and deployments.
- Coordinate/assist developers with establishing and applying appropriate branching and merging conventions using **GIT** source control.
- Working knowledge on merging code lines in the **GIT** and resolving all the conflicts raised during merges.
- Implemented & maintained the branching and build/release strategies utilizing **GIT**.
- Initiated **C. I process** my project and set up the **Jenkins tool from scratch**. Created new build jobs, set up master/slave concepts to distribute the load, and run different builds with different configurations.
- Created **Pipelines** using **Jenkins file**. Also worked on manual pipelines.
- Configuring pre and post-build actions in **Jenkins** as per project requirements.
- Automate the Build Process Using **Jenkins** jobs.
- Experience in setting up and managing **Docker** private repository.
- Having experience in creating custom **Docker** Images using Docker files.
- Experience working on several **Docker** components like Docker Engine, Hub, Container, and Docker Registry.
- Automated application containerization by writing Docker file and creating images. The application environment will be automatically built with the given number of containers with application setup out of the box.
- Worked on various tools which include Build Tools- **Maven**, Continuous Integration Tools **Jenkins** and Servers-**Apache Tomcat**, Automation Tool- **Ansible**.
- Experienced in Build, Deployment, Configuration, and Release management.
- Proficiency with build and continuous integration system concepts.
- Experience in deploying artifacts like **WAR** and **EAR** into application servers Apache Tomcat and Web logic servers.
- Setup Chef in the production environment. Good knowledge of end-to-end production Chef Environment.
- Developed cookbooks for application deployments with tomcat, **JDK**, war file, and post deployment configurations.
- Knowledge of **AWS-EC2 instance, ELB, and Auto-scaling**.
- Responsible to install and configure **Kubernetes** in physical as well as cloud environments.
- Well aware of the advantages, architecture, and complete workflow of **Kubernetes**.
- Good knowledge of every component of **Kubernetes**.
- Installed and configured **K8S master and K8S nodes** and established communication between them.

## Skills

- Analytical Thinking and Problem Solving
- Amazon Web Services
- Object-Oriented Programming
- Software Components and Libraries

## Experience

**DevOps Engineer**, 01/2022 to Current

**Avantus** – Harlingen, TX

The project is about maintaining an e-commerce website of Sears 24/7. As a major part of Sears's business is based on E-commerce sites that should available all the time, our team's job is to build and release code for deployment on appropriate servers to the Deployment team. The site will be developed in 4 stages- Integration stage, testing (QA) stage, staging (advanced testing) stage, and production.

**DevOps Engineer**, 11/2019 to 11/2021

**Avantus** – Houlton, ME

- Excelity ESS Portal is a web-enabled integrated HR system that supports all the core HR functions which are used by Excelity onsite clients. The primary goal of this web application is to keep track of employee personal information, leaves & attendance information. The application features will be accessible by the user based on the role base defined by the system. This System provides capabilities and features that are critical to the organization with a smart workflow approach to ensure efficient and effective management of employees. The system is designed to make life easy for all types of users, with an integrated workflow to support all administrative processes and includes useful guides. Managers and supervisors can more effectively manage their subordinates
