Offshore, Testing, Training, UAT, User Stories, Use Cases, NetSuite, CRM, Marketo, Insurance Systems

WORK EXPERIENCE

Sr. Business System Analyst - Health Care

UPTODATE - June 2014 – Present

- UpToDate is an evidence-based clinical decision support resource for healthcare practitioners. Assess and analyze the business environment to define the scope of the business problems, capturing project requirements.
- Objectives and expectations. Elicit requirements for projects, enhancements, or defect fix requests using Interviews, workshops, data analysis, current business process descriptions, task, and workflow analysis.
- Functional specifications, data mappings, and user stories. Support sales operations, marketing, customer service and finance departments.
- Translations for all user screens and user documents. Post implementation support and enhancements.
- SalesLogix (CRM) projects to implement new products for us and international enterprise customers. Wrote user stories, functional specifications, application configurations, coordinate QA and UAT testing and post-implementation support for sales ops.
- Gather, document, and analyze client functional, transactional and insurance product business requirements for first Best's underwriting management system (UMS). Client facing and consultative role offering system solutions to enhance client implementations and transform client workflow and business processes.
- Between the customer and technical team providing support throughout the project development life cycle. Used the UMS configuration tool to build and maintain application forms and rules. Sales team support on RFP.

Sr. Business System Analyst

FIRSTBEST SYSTEMS - November 2005 – April 2014

- Co-lead a two year-long series of implementations through requirements gathering sessions, functional.
