## SQL Server BI Developer (SQL/SSIS/SSRS)

E-mail: info@qwikresume.com

Phone: (0123)-456-789

### SUMMARY

SQL Server BI Developer with 6 years of experience in the Healthcare domain. Experience in Database Design, Programming, Development, and Implementation of Client-Server Applications & Database systems using MSSQL. Experienced in Installing, Upgrading and Configuring of Microsoft SQL Server and Databases. Proficient in SQL Server and T-SQL (DDL and DML) in constructing Tables, Normalization techniques on database Tables.

### SKILLS

Data Warehouse Tools, SQL Server Integration Services (SSIS), SQL Reporting Services (SSRS), SSMS, Business Intelligence Development Studio, DTS, Enterprise Manager, SQL Profiler.

### WORK EXPERIENCE

#### SQL Server BI Developer (SQL/SSIS/SSRS)

Inventive Health - January 2013 – Present

- Involving in requirement gathering, analysis, implementation, development, and production.
- Creating dynamic queries to perform ETL operations by looping through multiple database servers and tables.
- Importing and extracting data from various sources such as flat file, access, SQL server and loaded those data into SQL server to build various reports.
- Designing and developing the various analytical reports from multiple data sources by blending data on a single worksheet in tableau desktop.
- Troubleshooting SSIS packages and migration procedures and documenting the complex SSIS packages and migration procedures.
- SQL server database modeling, design and development with complex sql scripts, stored procedure, views, defined functions, triggers.
- Designing and developing the mappings to load the data from flat file to SQL server tables for reporting purposes.

#### SQL Server BI Developer

ABC Corp - 2012 – 2013

- Involved in creating reports, creating stored procedures and improving query performance.
- Developed stored procedures and views for data import and manipulation.
- Expert in extracting and transforming data using DTS in SQL server, SSIS in SQL.
- Restricted data for particular users using row level security and used filters.
- Involved in the migration of databases from SQL Server 2008 to SQL Server 2012 using SSIS and third-party tools of pragmatic work Dtsxchange.
- Involved in designing, developing and testing of the ETL (extract, transformation, and load) strategy to populate the data from various source systems feeds using SSIS.
