

# Taylor Foster

## Senior Azure DevOps Engineer

@ johndoe@email.com

San Francisco, CA

### SUMMARY

Passionate and experienced Senior Azure DevOps Engineer with a strong background in cloud native technologies and infrastructure automation. Skilled in coaching, guiding, and leading change to remove impediments and enable business objectives. Proven ability to solve complex problems and mentor team members to promote growth and minimize technical debt.

### EXPERIENCE

#### Senior Azure DevOps Engineer

##### ABC Consulting

2019 - 2022 San Francisco, CA

Delivered cloud-based solutions for multiple clients, resulting in an average 30% reduction in deployment time and cost. Led the adoption of DevOps best practices, resulting in improved collaboration and faster time to market. Developed and implemented Infrastructure as Code using Terraform and Ansible to improve scalability and reliability.

- Implemented Kubernetes clusters on Azure and AWS, resulting in improved scalability and reduced infrastructure costs.
- Developed and maintained CI/CD pipelines using Azure DevOps and GitLab, resulting in faster and more reliable deployments.
- Designed and implemented monitoring and alerting solutions using Prometheus, Elasticsearch, and Grafana, resulting in improved observability and reduced downtime.

#### DevOps Engineer

##### XYZ Healthcare

2017 - 2018 New York, NY

Improved infrastructure automation using Chef and Puppet, resulting in a 40% reduction in deployment time and increased reliability. Led the adoption of containerization using Docker and Kubernetes, resulting in improved scalability and reduced infrastructure costs. Mentored team members on CI/CD best practices and Git workflows.

- Designed and implemented a Disaster Recovery plan using Azure Site Recovery, resulting in improved business continuity.
- Developed and maintained Infrastructure as Code using Terraform, Ansible, Chef, and Puppet, resulting in improved reliability and scalability.
- Implemented Git workflows and trained team members on CI/CD best practices, resulting in faster and more reliable deployments.

### STRENGTHS

#### Process Optimization

Reduced build times by 30% by optimizing CI/CD pipelines

#### Team Collaboration

Improved team communication and collaboration resulting in successful project delivery

#### Problem Solving

Identified and resolved complex infrastructure issues for critical applications

### SKILLS

Jenkins

Azure DevOps

GitLab

Terraform

Ansible

Kubernetes

Prometheus

Elasticsearch

Grafana

Java

Python

### ACHIEVEMENTS

#### Successful Cloud Migration

Managed successful migration of critical application to cloud infrastructure, resulting in significant cost savings

#### Team Mentoring

Mentored junior team members resulting in improved skills and career growth opportunities

### AWARDS

#### Employee of the Month

Recognized for outstanding contributions to project success and team collaboration
