Worked extensively with Fortune 1000 companies.

Professional Experience

Principal Information Systems Consultant, NAME OF COMPANY, CITY, ST

11/99 - 09/02

Worked with Fortune 1000 clients as Technical Liaison managing relationships with numerous business and technical clients during strategy and planning phases for this management and technology consulting firm. Analyzed corporate business processes to develop customized solutions, and reduce costs, improve performance within a given budget. Led planning meetings, JAD sessions, analysis development, test inspections, and other project meetings throughout product life cycle. Conducted interviews and developed business cases to implement process changes, develop training materials, and instructed clients on new processes and procedures. Major accomplishments:

- Promoted to group lead directing full-time employees at client site for ability to identify, develop, and manage over 8,000 technological requirements through a multi-year project life cycle.
- Played key role in design and execution of 60-day implementation model to capture design and development requirements in an iterative development life cycle that reduced lead-time by over 50%.
- Played key role in call center turn around project resulting in reducing caller waiting time, improving call response times and increasing first call resolution by 42%
- Led strategic planning initiative to secure proposed budget for the consolidation of nine call centers by identifying CRM and process improvement opportunities.
- Recipient of Employee of the Year award as well as multiple technical excellence awards.

Project Lead, NAME OF COMPANY, CITY, ST

05/98 - 11/99

Identified new business development opportunities for this management and technology consulting firm; analyzed business processes to identify areas of reducing operating costs and improving efficiencies; recommended and implemented new technology solutions; and trained clients how to utilize new technology to reach their business goals. Modeled new business processes and customized solutions to accommodate budget and build in scalability. Recommended and implemented web development, management and marketing solutions from conception through delivery. Major accomplishments:

- Designed and implemented a fully automated sales and proposal generation process that linked supply, pricing and accounting systems reducing proposal generation time by 75% and improving sales 800%.
- Added value to the business by turning a "Paper and Pen" organization into a completely automated recruiting office by formalizing all business processes into an integrated database.
- Developed marketing strategies for a real estate broker and an agent by formalizing their business processes and enhanced their public presence by recommending and implementing effective web solutions.
