- Collaborated with team of [Number] in the development of [Project name].
- Achieved [Result] by completing [Task] with accuracy and efficiency.
- Supervised team of [Number] staff members.
- Achieved [Result] through effectively helping with [Task].
- Documented and resolved [Issue] which led to [Results].

SKILLS

- | | |
|--------------------------------|--------------------------------------------|
| • Back-End and Database Skills | • Express Js |
| • Critical Thinking | • Front-End Programming: HTML5, CSS3, AJAX |
| • Responsive Web Design | • JS Frameworks: React, Angular, Vue |
| • Continuous Improvement | • MVC Framework |
| • Mean Stack | • Design Patterns and Principles |

WORK HISTORY

03/2020 to 05/2022 **Senior Full Stack Web Developer**

Accenture – Tacoma, WA

- Reviewed code, debugged problems and corrected issues.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.
- Managed development milestones from initial steps through final delivery.
- Gathered and defined customer requirements to develop clear specifications for project plans.
- Built user interface, data visualizations and designed overall user experience, resulting in 30% increase in sales.
- Crafted SEO strategy and intuitive interface for site to achieve prominent rankings across top browser platforms.
- Boosted web traffic by improving navigation, resource optimize and caching.
- Maintained strict budgetary and scheduling guidelines to satisfy customers with high-quality, targeted designs.
- Planned and engineered RESTful web services to manipulate dynamic datasets.
- Took initial concepts and developed project plans.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- Boosted network, system and data availability and integrity through preventive maintenance and upgrades.
- Adjusted design parameters to boost performance and incorporate new features.
- Coordinated with other engineers to evaluate and improve software and hardware interfaces.
- Consulted with engineering team members to determine system loads and develop improvement plans.
- Delivered performance-driven and user-centric websites that met all business requirements.
- Orchestrated efficient large-scale software deployments.
- Inspected equipment, assessed functionality and optimized controls.
- Completed full redesigns of existing websites to improve navigation, enhance visuals and strengthen search engine rankings.
- Collected, defined and translated user requirements into project designs and implementation plans.
- Conceived and built optimized landing pages in HTML and CSS for integration and cross-browser compatibility.
- Delivered user support to clients to train, educate and answer questions.
- Employed coding practices based on commonly accepted standards to establish site layout and user interface.
- Conducted unit testing to deliver optimal browser functionality.
- Created powerful Content Management Systems to serve as interface for client.
- Collaborated with in-house web designers to create sleek and innovative UI design.
- Developed landing pages, dashboards and online applications using [Software], [Software] and [Type] scripting.
- Reviewed code to validate structures, assess security and verify browser, device and operating system compatibility.
- Designed and executed security measures such as firewalls and encryption.
- Developed user-oriented visuals and features using front-end languages to increase site traffic.
- Owned more than [Number] projects per year from initial research and conceptual design through testing and implementation phases.
- Trained and supervised [Number] team members for ongoing [Type] projects.
- Took concepts and produced design mockups and prototypes to strengthen designs, enhance user experiences and improve site interactions.
- Developed [Type] e-commerce website to reduce cart abandonment rate by [Number]%, resulting in increased online sales after go-live date.
- Developed, coded and updated [Type] and [Type] sites for clients such as [Client name] and [Client name].
- Spearheaded production of page content such as visuals and text copy to meet project specifications.
- Built user interface, data visualizations and designed overall user experience, resulting in [Number]% increase in sales.
- Boosted web traffic by improving navigation, [Action] and [Action].

09/2016 to 03/2020 **React Developer**

Cognizant Technology Solutions – Bay Shore, NY

- Reviewed code, debugged problems and corrected issues.
- Worked independently to design, develop and test code for [Company].
- Applied change control best practices to Django development processes to provide software enhancements without disruptions for end users.
- Collaborated with quality assurance team to verify correct implementation of software development changes.
- Integrated Java-based web service such as REST and SOAP into database management projects using Python.
- Identified possible system enhancements to improving functionality and streamline administration.
- Designed web-based assets for deployment on Amazon Web Services (AWS) cloud computing platforms.
- Led team-wide Scrum lifecycle practices, maintaining on-time milestone rate of [Number]%.
- Designed customer-facing front end for [Type] websites relying heavily on data-driven back end processing.
- Remained abreast of developments in related Python frameworks.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.
- Managed development milestones from initial steps through final delivery.
- Gathered and defined customer requirements to develop clear specifications for project plans.
- Discussed project progress with customers, collected feedback on different stages and directly addressed concerns.
- Adjusted design parameters to boost performance and incorporate new features.
- Coordinated with other engineers to evaluate and improve software and hardware interfaces.
- Orchestrated efficient large-scale software deployments.
- Delivered performance-driven and user-centric websites that met all business requirements.
- Conducted unit testing to deliver optimal browser functionality.
- Wrote technical documentation to communicate key points to stakeholders.
- Architected, developed and deployed decentralized applications to provide permission access to data at smart contract and protocol levels.
- Participated in vision workshops and created minimum viable products to get business buy-in and demonstrate ROI.
- Constructed integration libraries to interface with servers and APIs.
- Collaborated with engineering team to review application requirements, plan implementation details and estimate delivery timelines.
- Performed research to develop protocol upgrades and new financial contracts.
- Solved complex engineering problems to deliver results aligned with team objectives.
- Built stable and secure systems to translate dense technical topics to stakeholders less versed with blockchain applications.
- Led, built and owned backend services and infrastructure to power core blockchain-based products.
- Implemented, tested and audited open-source software to interact with on-chain smart contracts.
- Quickly learned new skills and applied them to daily tasks, improving efficiency and productivity.
- Carried out day-day-duty accurately and efficiently.
- Demonstrated respect, friendliness and willingness to help wherever needed.
- Worked flexible hours; night, weekend, and holiday shifts.
- Performed duties in accordance with applicable standards, policies and regulatory guidelines to promote safe working environment.
- Maintained energy and enthusiasm in fast-paced environment.
- Proved successful working within tight deadlines and fast-paced atmosphere.
- Used critical thinking to break down problems, evaluate solutions and make decisions.
- Offered friendly and efficient service to customers, handled challenging situations with ease.
- Developed and maintained courteous and effective working relationships.
- Offered friendly and efficient service to customers, handled challenging situations with ease.
- Planned website development, converting mockups into usable web presence with HTML, JavaScript, AJAX and JSON coding.
- Provided front-end website development using WordPress, Hubspot and other editing software.
- Coded websites using HTML, CSS, JavaScript and jQuery languages.
- Conducted testing and review of website design for responsiveness, clarity and effectiveness.
- Multi-tasked across multiple functions and roles to generate project results and meet deadlines and organizational expectations.
- Built and styled new mobile-friendly websites, transitioning legacy presentations to simultaneous easy-to-use versions.
- Determined coding requirements for site creation, e-commerce capability, security and specialized scripts.
- Conducted functional testing over course of web development lifecycle.
- Oversaw back-end development using PHP to maintain website integrity, security and efficiency.
- Implemented website maintenance, content management, updates and security resource tutorials to assist end-user training.
- Pulled from PHP, SQL, JavaScript and other back-end library knowledge to bolster programming resources.
- Modified existing code written in programming languages such as [Type] and [Type].
- Employed search engine optimization tactics to increase reach of targeted audience.
- Discussed site and app requirements with clients to produce actionable development plans and budgets.
- Converted graphic designs to usable web images using Adobe Photo Shop.
- Provided ongoing efficiency and security maintenance and patching on website interface to maintain viability after launch.
- Implemented Google-based SEO and ad campaigns to meet budget specifications.
- Developed functional digital design concepts across various platforms to strengthen company brand and identity.
- Generated web hosting presence to accommodate specified needs, uploading and maintaining files on account.
- Collaborated with graphic design personnel to integrate images as basic site components.
- Established presentation consistency across Chrome, Safari, Firefox and other common browser interfaces.
- Embedded media into sites using reliable, streamlined protocols and technologies.
- Worked with [Job title] to synchronize web presence with brand identity and logo.
- Applied latest emerging technology, software and project application trends to update and maintain site applicability.
- Engaged with [Job title] to plan, optimize and repair site issues and queries based on [Type] technology.
- Developed technical solutions required to accommodate specific user-facing assets such as [Product or Service].
- Collaborated with marketing department to determine organizational need and design pages to meet goals.
- Ran debugging tools such as Firebug and Chrome Inspector to eliminate flaws and glitches prior to publishing.
- Collaborated with [Job Title], representing web team to establish project goals, projections and milestones.
- Consulted with marketing department to ascertain organizational requirements, then compile, refine and generate webpage roadmap to achieve objectives.
- Validated personal coding and third-party code to verify compliance with internal standards and technical requirements.
- Oversaw technical [Type] issues and troubleshooting requests to resolve surfaced problems.
- Strengthened organizational intranet program and sub-sites to bolster internal communication strategies.
- Employed [Software] and [Software]-based content management systems.
- Assisted web presence planning, implementing changes and integrating requested elements to streamline business operations.
- Drafted customized layout and wireframes based on predetermined parameters and expectations.
- Adhered to SEO best practices while designing sites and public-facing online deliverables.
- Managed full-cycle design tasks, handling phases from conception to completion while maintaining guidelines throughout.
- Produced websites compatible with multiple browsers.
- Designed and updated layouts to meet usability and performance requirements.
- Collaborated with stakeholders during development processes to confirm creative proposals and design best practices.
- Reviewed and tested customer-facing prototypes before deployment, applying best practice diagnostic techniques to verify usability.
- Generated design frameworks designed to encourage maximal user response rates to ad placements.
- Drafted design timeline specifications to create accurate project deadlines and set budgetary metrics.
- Verified web-based products fulfilled prescribed project needs through direct interaction with stakeholders.
- Conceptualized digital creative campaigns and initiatives in close collaboration with marketing team.
- Pinpointed user experience issues to devise targeted suggestions for improving user experience.
- Integrated regulatory and compliance standards into product designs.
- Developed customer-facing communications with measurable click-thru rates for marketing conversion tracking.
- Designed email marketing assets, powering outreach campaign execution.
- Adhered to internal risk control and liability mitigation guidelines.
- Crafted SEO strategy and intuitive interface for site to achieve prominent rankings across top browser platforms.
- Completed full redesigns of existing websites to improve navigation, enhance visuals and strengthen search engine rankings.
