EXPERIENCE

DEVOPS ENGINEER SENIOR SPECIALIST

Houston, TX

05/2015 – present

- Workflow design and development
- Ongoing support of developed solutions
- Script design and development
- Proficient with Unix/Linux including SSH, Telnet
- DevOps tool research, selection, proof of concept, installation and configuration
- Source control repository design and implementation
- Participate in process analysis and documentation

DEVOPS ENGINEER, SENIOR

Philadelphia, PA

05/2011 – 12/2014

- Work closely and team with Developers, QA and Cloud Operations to develop and maintain the Cloud Supply Chain frameworks, technologies and feedback tools
- Ensure each phase of the Cloud Supply Chain from product management, through development, QA, Staging and into Production is fully automated, as frictionless as possible utilizing CI and CD. At each stage metrics and monitoring will fully visualize the Supply Chain status for the entire product team.
Automate everything possible!!
- Manage the costs of the development environments using labeling and automatic VM removal
- Establish and maintain the infrastructure to support automated unit, system and load testing
- Model the cloud infrastructure costs of new candidate releases
- Take an active part in a culture that is nimble, energized, customer centric as is typical in a leading SaaS company
- Ensure information security best practices and policies are implemented in your designs

DEVOPS ENGINEER SENIOR

Chicago, IL

09/2007 – 11/2010

- Communicates clearly and concisely, both orally and in writing
- Conducts research and make proactive decisions and recommendations on standards, products, and services in support of the Unified Commerce Platform
- Implements all technologies in accordance with Information Security's guiding principles for highly sensitive data
- Implements and maintains system configurations and baselines to support secure application development software control best practices and standards
- Provides support to team members in order to achieve partners, business, and customer results
- Cultivates an environment where associates respect and adhere to company standards of integrity and ethics
- Solving a problem with a software development mindset

EDUCATION

UNIVERSITY OF ILLINOIS AT CHICAGO

Bachelor's Degree in Information Technology
