

JESSICA CLAIRE

Montgomery Street, San Francisco, CA 94105 • (555) 432-1000 • resumesample@example.com

CAREER OVERVIEW

Five (5) years of IT experience with Four (4) years of work experience in major aspects of SAP BW/BI implementation.

Two full life cycle projects (ASAP methodology) implementations in BW with proven results in meeting reporting requirements, analysis, as well as design, construction and delivery of end user reports.

Good knowledge of BI 7.0 configuration requirements, processes, and tools.

End-to-End BW Development: Data Extraction, Transformation, Staging and Reporting using BEx and Web Application Designer.

Extensively worked in Data Extraction from Multiple SAP and Non SAP (Legacy) Systems using Business Content, LO, CO-PA, FI-GL, Flat File, and Generic Extraction Methods for legacy data.

Strong hands on Extraction (LO-Cockpit, FI/CO, SD, and MM) of Master data and transactional data.

Experience in FIGL, Accounts Receivable and Accounts Payable, Cost Center Accounting, Internal Orders, Profitability Analysis.

SAP BW technical expertise in Data modeling of DSOs, InfoCubes, MultiProviders and Infosets.

Experience in the creation InfoPackages, Datasource, DTPs, Transformation and Process Chains.

Extensive experience in design and development of reports/queries with BEx Analyzer, Query Designer, Web Application Designer.

Extensive knowledge of BEx Analyzer, and BEx Query Designer for developing reports, analysis and Web reporting using BEx Web Publisher and BEx Web Application designer.

Solid knowledge of System Administration, Security, Data Loading (Full /Delta Up-Load), Scheduling, and Monitoring.

Experience in Performance Tuning (Query and Data Loading): Aggregates, Compression, Roll-Up, Re-modeling, Indices, and Statistics.

Hands on experience in Maintenance, installation and Enhancement of Business Content objects and worked extensively with process chain for automation of process and better performance.

Leadership, critical thinking, and excellent verbal skills.

Strong problem-solving, analytical abilities and aptitude to rapidly pick-up new technologies, ideas and propositions.

QUALIFICATIONS

SAP R/3 (ECC), BW: Strong background in Enterprise Data Warehouse.

Reporting Tool : SAP Business Explorer.

Environments: SAP NetWeaver 7.0, ECC5.0, 6.0, BEx Analyzer and Web Application Designer.

Microsoft Tools: PowerPoint, Project Management, Excel and Word.

WORK EXPERIENCE

SAP BI Consultant, 2013 - Current

AMTRAK – City, STATE

EXPERIENCE:

Client : AMTRAK, Houston-TX January, 2013- Present

Role : SAP BI Consultant.

Capacity: BI implementation and Reporting.

Provided recommendations for overall system design and involved in dialog with Project team regarding new requirements and related issues.

Interfaced with Business Community to obtain reporting requirements that were converted to functional and technical specifications.

Enhanced the extract structures by adding new fields and populating them with the user/function exits in CMOD.

Involved in the Modeling, building and customizing InfoObject, DSO, InfoCubes, InfoSets and Multiproviders as per the functional specifications.

Created Process Chains to schedule the data loads into data targets, infocubes and Rollups.

Performed and setup multiple extractors in LO cockpit.

Executed load balancing and data packet sizing for Performance Enhancements.

Created various reports on the Material master data material, mat_plant and mat_sales.

Created both technical and functional designs for BEx queries.

Trained IT team on details of the ETL process and OLAP in BI 7.0. Also covered data modeling (Star schema concepts), strategic reporting and analytic, performance tuning etc.

Client : Mallory Alexander International Logistics, ND. June 2012– October 2012

Role : SAP BW Developer Consultant.

Capacity: SAP BW 7.0

Created custom queries using variables and structures. Worked on RRI Jump queries and worked on Web Reporting and Broadcasting.

Involved in a fresh BW implementation. Using ASAP methodology, actively involved in requirement gathering and gap analysis to translate findings into BW.

Created and configured InfoObject, DatastoreObjects, InfoCubes, Multiproviders and InfoSets based on Client Business requirements.

Involved in a fresh BW implementation.

Created and configured InfoObject, DatastoreObjects, InfoCubes, Multiproviders and InfoSets based on Client Business requirements.

Created Datasources, InfoPackages, Transformations and DTPs to extract data from multiple sources such as FlatFiles and using DB and UD connect to extract data from relational databases and multidimensional database respectively.

Worked with system administration teams to define specifications for frequency and mode of data transfers and setup batch jobs.

Activated Business content Objects and Datasources in R/3 for FIGL, Accounts Receivable and Accounts Payable, and Profitability Analysis.

Created aggregates, compression and roll up manual and process activation.

Worked on performance tuning to improve data loading and query performances.

Worked on the remodeling of InfoCubes.

Perform cost-benefit and return on investment (ROI) analysis for proposed changes to aid management in making implementation decisions

Verified adherence and performance to standard plans and procedures.

Generated queries for reports using BEx query designer, to do drill-down analysis and formatted these reports with web application designer (WAD) for publishing over web.

Configured use of restricted key figures, structures, variables and calculated key figures in BEX reporting queries.

Setup flat file extraction for legacy data, assigned data sources to the info source, defining transfer structure, and meta data maintenance for the info source and source system.

Client : Logic Gate, Nebraska. May, 2011 – April 2012

Role : SAP BW Developer.

Capacity: SAP BW 7.0 Implementation and Data Warehousing.

Assisted in the documentation of all design build activities.

Analyzed business requirements, performed GAP analysis with respect to the data models needs and available business content.

Conducted Testing (Unit, Functional, Integration, Regression and User Acceptance).

Activated standard Business Content DataSources FI-AP, FI-AR, FI-GL and logistics datasources for SD, PP and MM.

Activated infocubes and other data targets for these datasources FI-AP, FI-AR, FI-GL and logistics datasources for SD, PP and MM.

Installation of Business Content in Sales & Distribution, Material Management and Finance functional areas. Developed generic transactional and master data datasources to fill gaps.

Created process chain to schedule the data loads into infocubes and aggregates.

Developed web templates for use with queries and deployment in Portal.

Developed queries, variables, structures, restricted key figures, calculated key figures, conditions and exceptions.

Maintained InfoCube operation by employing various techniques such as Optimizing dimension size, compression, aggregates, logical partitioning and line item dimensions.

Worked on the remodeling of InfoCubes.

Created both excel and web based reports for FIs.

Involved in a fresh BW implementation.

Created and configured InfoObject, DatastoreObjects, InfoCubes, Multiproviders and InfoSets based on Client Business requirements.

Created Datasources, InfoPackages, Transformations and DTPs to extract data from multiple sources such as FlatFiles and using DB and UD connect to extract data from relational databases and multidimensional database respectively.

Worked with system administration teams to define specifications for frequency and mode of data transfers and setup batch jobs.

Activated Business content Objects and Datasources in R/3 for FIGL, Accounts Receivable and Accounts Payable, and Profitability Analysis.

Created aggregates and compression.

Worked on performance tuning to improve data loading and query performances.

Maintained InfoCube operation by employing various techniques such as Optimizing dimension size, compression, aggregates, logical partitioning and line item dimensions.

Worked on the remodeling of InfoCubes.

Created both excel and web based reports for FIs.

Involved in a fresh BW implementation.

Created and configured InfoObject, DatastoreObjects, InfoCubes, Multiproviders and InfoSets based on Client Business requirements.

Created Datasources, InfoPackages, Transformations and DTPs to extract data from multiple sources such as FlatFiles and using DB and UD connect to extract data from relational databases and multidimensional database respectively.

Worked with system administration teams to define specifications for frequency and mode of data transfers and setup batch jobs.

Activated Business content Objects and Datasources in R/3 for FIGL, Accounts Receivable and Accounts Payable, and Profitability Analysis.

Created aggregates and compression.

Worked on performance tuning to improve data loading and query performances.

Maintained InfoCube operation by employing various techniques such as Optimizing dimension size, compression, aggregates, logical partitioning and line item dimensions.

Worked on the remodeling of InfoCubes.

Created both excel and web based reports for FIs.

Involved in a fresh BW implementation.

Created and configured InfoObject, DatastoreObjects, InfoCubes, Multiproviders and InfoSets based on Client Business requirements.

Created Datasources, InfoPackages, Transformations and DTPs to extract data from multiple sources such as FlatFiles and using DB and UD connect to extract data from relational databases and multidimensional database respectively.

Worked with system administration teams to define specifications for frequency and mode of data transfers and setup batch jobs.

Activated Business content Objects and Datasources in R/3 for FIGL, Accounts Receivable and Accounts Payable, and Profitability Analysis.

Created aggregates and compression.

Worked on performance tuning to improve data loading and query performances.

Maintained InfoCube operation by employing various techniques such as Optimizing dimension size, compression, aggregates, logical partitioning and line item dimensions.

Worked on the remodeling of InfoCubes.

Created both excel and web based reports for FIs.

Involved in a fresh BW implementation.

Created and configured InfoObject, DatastoreObjects, InfoCubes, Multiproviders and InfoSets based on Client Business requirements.
