

PETER CONNOLLY

ETL Developer

(726) • peter.connolly34@yahoo.com • flashy-traveler.org • Fort Tyreefurt, Paraguay

My Life Philosophy

The biggest risk is not taking any risk. In a world that is changing quickly, the only strategy that is guaranteed to fail is not taking risks.

Summary

Experienced ETL Developer with a passion for developing high-quality code and delivering solutions that meet business needs. Skilled in evaluating, designing, and implementing data engineering solutions in both on-premise and cloud-based environments. Strong understanding of data governance, security, and compliance. Proven track record in identifying data sources, integrating and cleansing data, and converting data. Committed to delivering projects on time and in line with coding standards. Excellent team player with a positive attitude. Seeking an opportunity to contribute to a dynamic company's mission and take the next step in my career.

Strengths

Problem Solving

Demonstrated ability to analyze complex data problems and develop innovative solutions resulting in improved data processing efficiency and accuracy.

Collaboration

Proven track record of collaborating with cross-functional teams to gather requirements, define data solutions, and ensure successful project delivery.

Attention to Detail

Meticulous in data analysis and documentation, ensuring data integrity and accuracy in all ETL processes. Strong focus on quality assurance and error prevention.

Experience

ABC Technology Solutions ETL Developer

Birmingham

2022 - Ongoing

Designed and implemented efficient ETL processes to extract, transform, and load data from multiple source systems into a centralized data warehouse. Collaborated with cross-functional teams to gather requirements and ensure data quality and accuracy. Developed scalable solutions resulting in a 30% improvement in data processing time. Conducted data profiling and analysis to identify data quality issues and implemented corrective measures. Provided ongoing support and maintenance for ETL processes.

- Implemented data validation routines to ensure accurate and reliable data.
- Optimized SQL queries to improve performance and reduce processing time.
- Collaborated with data architects to design and implement data models.
- Developed and maintained documentation of ETL processes, data mappings, and business rules.
- Worked closely with business users to understand requirements and translate them into technical specifications.
- Assisted in troubleshooting data integration issues and provided timely resolutions.
- Implemented data quality measures and conducted data profiling to identify data anomalies.
