Informatica Power Center 9.x/8.x, Informatica Power Exchange 9.x/8.x, IDQ 9.6/9.1 BI Tools OBIEE (10G, 11G), Tableau, Scheduling Tools Control-M, Autosys Languages C, Java, C++, Python, R, RDBMS Oracle/ Exadata/11g/10g, DB2V9, Teradata14/13, PL/SQL, SQL Server 2008 Tools/Utilities Toad, Perl, UNIX Shell, Business Objects XI R1, Operating Systems Windows, UNIX, Linux Web Technologies HTML, CSS, XML, JAVA SCRIPT

### WORK EXPERIENCE

#### ETL Informatica Developer

Houston Independent School District - July 2015 - Present

- Involving in direct conversations with the business users and gather the requirements to how to handle the source data and design accordingly the ETL process.
- Using Informatica power center 9.6.1 to extract the data from insurance application AS400 to transform and load the data into the enterprise data warehouse & data mart.
- Developing the logical data models and physical data models with experience in forward and reverse engineering using Erwin.
- Involving in Information administration including creating new users and groups, backing up the repository and domain as well as handling various upgrades.
- Used Informatica B2B data exchange to handle EDI (electronic data exchange) for handling the payments for the scheduled dates.
- Using major components like parsers, mappers and streamers in data transformation studio for conversion of XML files to other formats.
- Implementing various data modeling schemas such as star schema and snowflake schema.

#### ETL Developer

ABC Corp - 2012 - 2015

- Created reference/passthrough ports in xml transformations to correlate the parsed data.
- Extracted data from Salesforce.com(sfdc), Oracle, Excel , Data files using Informatica ETL Mappings/SQL PLSQL scripts.
- Created and scheduled sessions, jobs based on demand, run on time and run only once using workflow manager.
- Implemented slowly changing dimension methodology for accessing the full history.
- Created several Informatica mappings to populate the data into dimensions and fact tables.
- Performed incremental aggregation to load incremental data into aggregate tables.
- Developed unix shell scripts for event waits, wait for files and pre-session tasks.
