Alabama.

Objective

Over 6+ years of experience in Analysis, Development, and Implementation of business applications including Development and Design of ETL methodologies using Informatica Power Exchange, Informatica Power Center, Pharmaceutical, Financial, and Telecom sectors.

Skills

Datastage, Informatica, Oracle, Data Warehousing, etc.

Work Experience

Junior ETL Developer

ABC Corporation - September 2007 – April 2008

- Responsibilities Extracted data transformed and loaded into Oracle database according to the specifications.
- Used various transformations like lookup transforming the Sales Force Data according to the business logic update strategy, router, filter, sequence generator, source qualifier/Joiner on data and extracted as per the technical specifications.
- Created Mapplets using Mapplet Designer to reuse Mapplets in the mappings.
- Experience in performing the analysis, design, and programming of ETL processes for Teradata,
- EDI Standard Evolution and Migration Solution Specification-Driven Transformation Used by Informatica to provide up-to-the-minute pre-built transformations in support of industry standards.
- Created debugging sessions before the session to validate the transformations and also used existing mappings in debug mode extensively for error identification by creating break points and monitoring the debug monitor.
- Improved the performance of the mappings by moving the filter transformations early into the transformation pipeline, performing the filtering at Source Qualifier for relational databases and selecting the table with fewer rows as master table in Joiner transformations.

ETL Developer

ABC Corporation - 2005 – 2007

- Organization Satyam Computer Services Limited, India Location Offshore Bhubaneswar Onsite NA Duration Offshore September 09-March 10 Onsite NA Team Size Project 4 Module 1 Environment (with skill versions) Languages Database Oracle 10g Tools Erwin 6.1, Informatica 8.1 O/S Windows XP, Sun Solaris Unix Responsibilities Integration with SAP source system, Data Integration Tools Selection from source to target.
- To understand the legacy source systems JDE and Compass and restructuring of GRID As a developer in GRID responsible for pulling data from SAP into GRID BW (Oracle).
- To analyze the system and giving better picture to handle the data.
- Generating ABAP codes to extract data from SAP.
- ETL Code reviews and migration to Production System.
- Project Profile 6 Project Name SEDW.
