Profile

DevOps Engineer with 1 year of professional experience in designing, implementing, and managing robust software deployment pipelines. Proficient in utilizing various DevOps tools, cloud platforms, and programming languages. Proven ability to work collaboratively within cross-functional teams, demonstrating strong problem-solving skills and a commitment to achieving project goals effectively. Seeking to leverage expertise to further develop and enhance system optimization strategies.

Employment History

DevOps Engineer at Northrop Grumman, AK

Apr 2023 - Present

- Led the successful migration of 300+ servers from on-premises to AWS cloud-based infrastructure, resulting in a 30% increase in system efficiency and a reduction in operational costs by 25%.
- Implemented automated CI/CD pipelines for 20+ software applications, reducing deployment time by 40% and increasing deployment frequency by 60%.
- Improved system availability by 99.9% by leading the design and implementation of a comprehensive disaster recovery and business continuity plan.
- Identified and resolved over 500 system issues, enhancing system performance by 35% and significantly reducing downtime.

Junior DevOps Engineer at General Communication Inc., AK

Sep 2022 - Mar 2023

- Successfully automated 30% of the previously manual systems administration tasks, saving the team an average of 15 hours per week.
- Played a key role in migrating the company's legacy systems to cloud-based solutions, reducing operational costs by 20% annually.
- Implemented continuous integration and continuous delivery (CI/CD) pipelines for 10 major projects, decreasing the average deployment time by 50%.
- Troubleshooted and resolved over 100 system issues, improving system reliability and uptime by 25%.
