

# DAN BOWEN

## SKILLS

### Programming Languages & Tools

Python · Java · C · GIT · Eclipse

### Data Tools

Rapid Miner · Apache Mahout · Hive ·

MapReduce · MongoDB · Excel

### Statistical Analysis Tools

SAS · R

## STRENGTHS

- 💡 Not afraid of wrong ideas**  
Getting it wrong is almost always part of getting it right. My bad idea can give you the spark needed to help us succeed, or vice versa. We can work better by helping each other spot flaws and suggest improvements.

- ✍ Keen learner**

Always learning in order to keep up-to-date with technology enhancements. Still in my early years as a Data scientist and therefore keen to learn as much as possible.

- 📅 Flexible**

Fine to work overtime or complete extra training if needed.

## Entry-Level Data Scientist

📞 +1-562-545-5945 📩 dan.bowen@gmail.com 💬 linkedin.com  
📍 Santa Ana, CA

## SUMMARY

Entry-Level Data Scientist who is keen to contribute to a cause. I am a young, energetic, and geeky individual whose desire to learn is endless.

## EDUCATION

### B.S. Data Science

2012 - 2016

### Stanford University

Palo Alto, CA

- Data Science Major in Foundational courses in Mathematics, Computing and Statistics
- Part of the Maths & Statistics Society for 3 years
- Took additional courses in Big Data Ecosystems and Data Visualisation

GPA | 3.8 / 4.0

## EXPERIENCE

### Junior Data Scientist

2016 - Ongoing

### Herman LLC

Santa Ana, CA

Herman LLC is an NGO gathering data about internal displacement

- Working in a team of 6 people
- Developed a company-wide digitized filing system with Python and Java that led to an increase in efficiency for all departments by 20% on average
- Developed internal analytics and data science services to tackle rising internal displacement in the Middle East
- Sourcing data for the UN from MongoDB with Rapid Miner and sorting it with Python scripts and Excel

### Data Scientist Internship

2014 - 2016

### Rolfson

Geneva, Switzerland

Rolfson is a Market Research Organization for enterprises.

- Forecasted sales for Volkswagen using a penalty regression, with predictive accuracy of 0.85
- Supported the fundraising (1M € fund raised)
- Completed 250h of training - Text Mining, Data Munging

## VOLUNTEER EXPERIENCE

### Data Analyst

2013 - 2014

### CrashData

Remote work

CrashData is the leading company that gathers data from a vehicle's sensors before, during and after a crash. The data is then used to improve road safety.

- Gathered data from 4000+ cars that were involved in road accidents using Python, Mahout, and Hive
- Organized the data in Excel and sent it back, contributing to a 40% decrease in fatal road accidents in 2015
