Internet: CSS	9
	

Work experience

Django Developer

Company Name, City, State

- Designed and developed web applications using Django, Python, and JavaScript, implementing responsive design and UX principles.
- Worked on projects ranging from small business websites to large-scale enterprise applications, collaborating with cross-functional teams to deliver high-quality software on time and within budget.
- Built and maintained RESTful APIs using Django Rest Framework, integrating with external services such as payment gateways and social media platforms.
- Developed and maintained databases using PostgreSQL and MySQL, writing optimized queries and ensuring data integrity and security.
- Configured and managed web servers using Apache and Nginx, ensuring high availability and scalability.
- Implemented testing strategies using tools such as Pytest and Unittest, ensuring that code is free of bugs and errors.
- Conducted code reviews and mentored junior developers, improving code quality and team performance.

Company Name, City, State

Django Developer, Employment Dates

- Developed and maintained e-commerce applications using Django, integrating with payment gateways such as PayPal and Stripe.
- Implemented third-party integrations such as Google Analytics and Google Maps API, enhancing user experience and application functionality.
- Worked with front-end frameworks such as Bootstrap and jQuery, creating responsive and modern user interfaces.
- Optimized application performance using caching techniques and database indexing.
- Implemented security measures such as CSRF protection, SSL, and user authentication and authorization.
- Built and deployed applications to cloud platforms such as AWS and Heroku, ensuring high availability and scalability.
- Collaborated with product managers and designers to translate business requirements into technical specifications.
