Address: 1737 Marshville Road,
Alabama

Objective

SQL Server Developer with 12 plus years of experience in the Retail domain. Hands on Experience in installing, configuring, managing, monitoring and troubleshooting SQL Server Expert in Microsoft Business Intelligence technologies like SQL Server Integration Services (SSIS), SQL Server Reporting Services (SSRS), and SQL Server Analysis Services (SSAS)

Skills

Database: SQL Server Oracle 10g, Sybase Technologies: SQL Server Management Studio, SSIS, SSAS, SSRS, Profiler, BI Express, Database Tuning Advisor, MS Office, Excel, MS Project, Oracle SQL Developer Tool, Version Control Tools: MS Visual Source Safe (VSS), Source Version Control (SVN), Microsoft Team Foundation Server (TFS) Programming Languages: C, C++, HTML, XML Operating Systems: Windows MS-DOS

Work Experience

SQL Server Developer

Stein Mart - March 2011 – Present

- Designing and developing the SSIS packages, stored procedures, configuration files, tables, views, indexes.
- Used SSIS to extract data from enterprise data warehouse, Oracle added multiple transformations to transform the data and finally loaded into the DB2 database.
- Using table difference, upsets, lookups, and conditional splits for finding deltas.
- Used SQL Bi-Xpress for managing, auditing and notification frameworks.
- Creating the SSIS jobs for monitoring the jobs that depend on daily loads and loading db2 database tables using SQL server agent.
- Automating tasks using active x script (similar to VB Script). Be able to implement failure alerts using email in SSIS.
- Involving in object-oriented design (UML, activity diagrams, use cases, and object modeling).

SQL Server Developer

ABC Corp - 2006 – 2011

- Developed transact-SQL (t-SQL) queries, stored procedures, triggers, user-defined functions (UDF), views, indexes, and user-defined data types strictly following the data integrity using constraints, rules, and default.
- Created Windows logins and privileges to user accounts/groups and objects.
- Developed CTEs, constraints, and complex queries to fetch the data from different servers.
- Worked with project stakeholders to understand business requirements and initiatives.
- Developed processes based on technical specifications and development standards.
- Performed unit testing on all development.
- Monitored the job performances to ensure processes run according to schedule. Troubleshoot and resolved the issues as needed.
