

Senior Java Developer

Michael Hibbison

SUMMARY

Motivated and skilled Senior Java Developer focusing on High-Performance, high-availability, and high-throughput systems. Strong problem-solving skills and in need of a challenge. A very good database designer, and for me, that is the building block for any application and service.

WORK EXPERIENCE

2016-08 - Present	Senior Java Developer Bank of America <ul style="list-style-type: none">Responsible for prepaid Airtime, Electricity, Lotto, Funeral Plans, Bills, etc.Investigating new technologies and frameworks that may make our lives a bit easier. Recently added GrayLog and Hashicorp Vault.Running a team of three developers and guiding them through requirements and how a system/component must be effectively developed, and sometimes they guide me, and it works well in the end.	JAVA/JAVAEE TECHNOLOGIES
2014-06 - 2016-07	Senior Java/.Net Developer Nextware Technologies <ul style="list-style-type: none">Designed, developed and maintained enterprise systems.Worked with J2EE, .Net and IOS on a daily basis.	Working on various technology frameworks and knowledge about programming concepts like: <ul style="list-style-type: none">SOLID, SpringOOP PrinciplesDesign PatternsUnit/Integration TestingData-structures and Algorithms
2010-05 - 2014-05	Java Developer Trigent Software <ul style="list-style-type: none">Worked on two projects during this time. Using JavaEE and Web Front end technologies like Java Servlet, JSP, Struts 2, JQuery, JQuery UI.Worked on the backend and frontend parts of the projects, but mostly the backend part.	JAVASCRIPT AND JAVASCRIPT TECHNOLOGIES
2006-03 - 2010-04	Software Developer HQSoftware <ul style="list-style-type: none">Designed, Developed and tested new applications and components using Continuous Integration Development.Programmed in Java/J2EE language and Worked with various technologies including Spring, Spring MVC, Maven, Hibernate, JDBC, SOAP, and RESTful web services.Developed automated functional and performance tests and data analysis software using Python language.Conducted compatibility and quality assurance testing.Configured, troubleshoot and tuned Relational Databases including Oracle and MySQL.Designed data models, created complex and efficient queries, partitioned tables for system improvements and chose the right Data Store for each component.Analyzed system specifications and proposed accurate technical solutions Implemented optimized and standard code using coding standards and technical design.Improved code quality by using code analysis tools like SonarQube.Redesigned components to reduce the cost of product development.Worked with version controls including SVN and Git.Deployed and tuned applications on Tomcat web server.Deployed components on Linux servers.Generated easy-to-read automated tests using Robot Test Framework Setup, configured and maintained virtual Linux servers.Agile teamwork using JIRA and Scrum boards.Provided accurate estimates on items of development work.Participated in the review of the colleague's code.Generated documents for customers.	Java EE (6 & 7) <ul style="list-style-type: none">EJB, JBossGlassfish, Web ServicesSocket Programming (NIO)

SKILLS

JAVA/JAVAEE TECHNOLOGIES

Working on various technology frameworks and knowledge about programming concepts like:

- SOLID, Spring
- OOP Principles
- Design Patterns
- Unit/Integration Testing
- Data-structures and Algorithms

JAVASCRIPT AND JAVASCRIPT TECHNOLOGIES

I have mixed the professional and study experience on JavaScript, overall concepts and technologies:

- AngularJS
- UnderscoreJS
- JavaScript OOP
- JQuery, RequireJS

Java EE (6 & 7)

- EJB, JBoss
- Glassfish, Web Services
- Socket Programming (NIO)

Java Web
