

JESSICA CLAIRE

100 Montgomery St. 10th Floor • (555) 432-1000 • resumesample@example.com

Summary

- 3 years of experience in the field of DevOps Engineer in application configurations, code compilation, packaging, building, automating, managing and releasing code from one environment to other and deploying to servers.
- 9+ years of overall experience working in Devops, Big Data and Datawarehouse Technologies.
- Experienced in Jenkins by installing, configuring and maintaining for purpose of continuous integration (CI) and for end to end automation for all build and deployments and creating Jenkins CI pipelines.
- Hands on experience with EC2, S3, RDS, VPC, ELB, EBS, Auto scaling.
- Experienced in branching, merging and maintaining the versions using SCM tools like Git and GitHub on windows and Linux platform.
- Experienced in Project Management and issue tracking tool like JIRA.
- Experienced in the creation of Docker containers and Docker consoles for managing the application life cycle.
- Creating custom Docker Images using Docker file for easier replication of DEV and QA Environments in local machines.
- Performed and deployed builds for various Environments like QA, Integration, UAT and Productions Environments. Developed and deployed Chef, puppet based on their cookbooks, recipes and manifest.
- Configured and monitored distributed and multi-platform servers using Nagios.
- Strong analytical and problem-solving skills and can work either independently with little or no supervision or as a member of a team.
- Good written and verbal communication skills, strong organizational skills and a hard-working team player, well-practiced in attending phone calls and answering business team queries.

Skills

- Versioning Tools - Git
- CI - Jenkins, Chef, Puppet
- Build Tools - Maven
- Ticket Tracking Tool - JIRA
- Containerization Tool - Docker
- Operating System - Windows , Unix
- AWS - Amazon EC2, S3, RDS, ELB, EBS, Auto scaling.
- Languages - SQL, NO SQL
- Scripting Language - Shell, Python
- Web server - Apache Tomcat
- Database - Oracle,SQL Server, MySQL, Teradata, DB2, Netezza
- Big Data - Hadoop, HDFS, Map Reduce, Flume, Pig,Sqoop, Hive, Oozie, MongoDB
- ETL - Ab Initio
- Monitoring Tool - Nagios

Experience

Devops Engineer, 01/2015 to Current

Amazon.Com, Inc. – Bethesda, MD

- Managed cookbooks in Chef and Implemented environments, roles, and templates in Chef for better environment management.
- Used Shell scripts to day to day activities and tasks for automating.
- Used Jenkins tool to automate the build process.
- Installing and configuring Jenkins master and slave nodes. Built CI/CD pipeline and managing the infrastructure as code using chef and puppet.
- Have experience in cloud platform like AWS.
- Created and implemented chef cookbooks for deployment and also used Chef Recipes to create a Deployment directly into Amazon EC2 instances.
- Worked in GIT to manage source code.
- Setup Chef Server, workstation, client and wrote scripts to deploy applications.
- Deployed the applications to Tomcat Application Server and static content to Apache web servers.
- Automated the continuous integration and deployments using Jenkins, Docker.
- Installed, Configured, and Managed Monitoring Tools such as Nagios for Resource Monitoring/Network Monitoring.
- Worked on Docker container to create Docker images for different environments.
- Responsible for taking the source code and compiling using Maven and package it in its distributable format, such as a WAR file.
- Implemented process for release management, automated code deployment, configuration management, and monitoring.

Environment: Amazon EC2, S3, RDS, VPC, ELB, EBS, Auto scaling, UNIX/LINUX, Redhat Linux 6, CentOS, Jenkins, Windows, Apache Tomcat, Shell Scripts, Docker, Nagios, puppet.

Big Data / Datawarehouse Tech Lead, 03/2012 to 01/2015

Cal Net Technology – Tucson, AZ

- Worked with systems engineering team to plan and deploy new Hadoop environments and expand existing Hadoop clusters with agile methodology.
- Monitored multiple Hadoop clusters environments using Control-M, monitored workload, job performance and capacity planning using Cloudera Manager.
- Experienced with through hands-on experience in all Hadoop, Java, SQL and Python.
- Participated in functional reviews, test specifications and documentation review.
- Performed MapReduce programs on log data to transform into structured way to find user location, age group, spending time.
- Analyzed the web log data using the HiveQL to extract number of unique visitors per day, page views, visit duration, most purchased product on website.
- Exported the analyzed data to the relational databases using Sqoop for visualization and to generate reports by Business Intelligence tools.
- Documented the systems processes and procedures for future references, responsible to manage data coming from different sources.
- Managed multiple projects as a Datawarehouse tech lead in Onsite - Offshore model.

Environment: Hadoop, HDFS, Map Reduce, Flume, Pig, Sqoop, Hive, Pig, Sqoop, Oozie, MongoDB, Shell Scripting.

Systems Engineer, 02/2011 to 03/2012

Infosys Ltd – Elk Grove, CA

- Supported in Gathering requirement and understanding the business functionality in case of TPR (Technical Project Request) document.
- Develop the graphs according to the business requirements.
- Analyze source systems file layouts and write DML for extracting the data from various sources like flat files, tables, Mainframe Copy Books, Responder Layouts.
- Involve in analyzing the data transformation logics, mapping implementations and data loading into target database through Ab-Initio graphs.
- Developing UNIX shell scripts for automation processes.
- Involve in fixing the unit and functional test case/data defects.
- Analysis of Existing application and identifying improvements.

Environment: Ab Initio 3.03, Teradata 12, UNIX (Sun Solaris Korn Shell).

Ab Initio Developer, 2009 to 02/2011

Hewlett Packard Global India Pvt Ltd. – City, STATE

- Develop the graphs according to the TPR document.
- Analyze source systems file layouts and write DML for extracting the data from tables.
- Involve in analyzing the data transformation logics, mapping implementations and data loading into target database through Ab-Initio graphs.
- Developing UNIX shell scripts for automating processes.
- Involve in fixing the unit and functional test case/data defects.
- Analysis of Existing application and identifying improvements.
- Prepare result analysis graphs to validate business test case results.
- Performance testing of all graphs against huge volumes of data.

Environment: Ab Initio 3.03, Teradata 12, UNIX (Sun Solaris Korn Shell), MOSS 2010.

Education

Bachelor of Engineering: Electronics and Communication, 2008

Anna University - Chennai, Tamil Nadu

Certifications

- Cloudera Certified Hadoop Developer (CCD - 410).
- Certified MongoDB Developer.
