## WORK EXPERIENCE

---

### ASSOCIATE DEVOPS ENGINEER

12/2016 - PRESENT

San Francisco, CA

- Research and analyze data processing functions, methods
- Past experience of working in Web and Digital technologies (Single Sign on, ADOBE AEM, IBM ISAM, Mobile compatibility, TIBCO Services)
- Possesses advanced knowledge and 3+ years of experience in project management, including managing at least two projects of significant complexity and value with moderate to high risk
- Regression Automation Assessment, Planning, Strategy and implementation. Knowledge on HP UFT, SPRTIZ is good to have
- Knowledge on Nonfunctional testing (Performance) planning, strategy and driving\mentoring performance test implementation
- Supporting Linux operating systems, both server and client or working as a software development engineer
- Experience with DevOps, Continuous Integration and Delivery

### DEVOPS

07/2013 - 06/2016

Dallas, TX

- Update application documentation for the Application Support team
- Conduct useful meetings for deployment activities
- Participate in internal CCB to ensure requests made to Engineering follow a consistent plan
- Manage and track all environments, ensure consistent stability for development, testing and operations
- Provide guidance to the Application Support team as it relates to any changes to applications and supporting production environments
- Understand the dataflow internally and to external partners
- Troubleshoot issues in all environments with applications or other infrastructure systems
- Work with development teams during the development process to ensure technical details are consistent with IT infrastructure

### JUNIOR DEVOPS ENGINEER

06/2006 - 01/2013

Boston, MA

- Proven enterprise development experience
- Experience with Infrastructure Automation tools
- Utilizing logging, monitoring, and alerting solutions, and/or similar solutions as a system administrator
- Knowledge in of collaboration technologies such as Atlassian
- Background in LINUX/UNIX Administration
- Use automation tools to perform and track deployments executed in production
- A working knowledge of xml and script reading
- Knowledge of best practices and IT operations
- Manage relationship between Engineering and Software Development, coordinate work between the two

## EDUCATION

---

### NORTH AMERICAN UNIVERSITY

2001 - 2006

Engineer's Degree in Computer Science

## PROFESSIONAL SKILLS

---

- Excellent risk management, mitigation skills, strong program and project management skills
- Strong problem solving and trouble shooting skills, and the ability to apply creative engineering and analytical skills to resolve system problems
- Excellent written and verbal communication skills & analytical and problem-solving skills
- Excellent communication skills and technical writing skills (Communicate technical design through diagrams, documents, and presentations)
- Programming Skills: advanced programming skills (Python, Go, Java)
- Proven experience in Scripting skills (Ruby, python and shell scripting) for Test automation creation
- Strong scripting skills with experience in Python, Ruby, Bash or other scripting languages
