- Sun Certified Programmer for the Java 2 Platform (SCJP), SE 6.0

ORGANIZATIONAL EXPERIENCE

May'09 onwards	IKaru Projects Pvt. Ltd.	Product Engineer

IKaru Projects Private Ltd is a global software outsourcing company. Its service domain includes e-learning, web design and development, social media applications, custom software development, content management system, mobile application development and e-commerce solutions.

IKEWIKI – Web Application for providing a cost-effective e-learning platform (Team Size: 9)

IKEWIKI is the flagship product of IKaru. It is a social learning platform to make e-learning a reality in organizations and educational institutions. Its aim is to develop the most usable and effective e-learning environment at a reasonable cost. The product was developed on GWT (Google Web Toolkit) 2.0 platform using Scribd API as document repertoire with MySQL as database and Tomcat as server.

Role : Developer – Worked on varied aspects of the application including initial requirement and design phase, back-end development as well as front-end implementation. Also worked as testing-lead for an iteration.

Recognitions – Was recognized as a star developer time & again and was always chosen for client interaction and handling technical aspects in a sales pitch.

July'07 to March'09	Sapient Corporation Pvt. Ltd.	Associate Technology

Sapient is a world-renowned global services company that helps clients transform in the areas of business, marketing, and technology. It specializes in marketing, advertising, consulting, trading and risk management.

Provisioning System for selective customer data migration (Team Size: 25)

The purpose was to provide an interface to migrate customer data from current mobile network to an advanced network based on the willingness of customers, ensuring minimum manual intervention. The solution was a J2EE application (Struts framework) using Oracle 9i database and Tomcat server. Log4J was used for logging and Castor for XML message generation. Hibernate was chosen as the ORM tool.

Role : Developer – Designed JSPs from wire-frames and requirement documents using tag libraries and created CSS markup for the entire application.

Recognitions – Was highly appreciated by the client for suggesting additional enhancements and by the team for client-focused delivery, leadership & creativity.

Set Top Box Application for Video on Demand (Team Size: 6)

The purpose was to enhance and support a set-top box application for a leading entertainment provider in Germany. It used a special browser for embedded systems (Ant Galio). The application was based on AJAX and was developed using OOJS (Object Oriented Javascript)

Role : Developer – Provided major enhancements to the project including complete redesign of the application interface as per the changes in business requirement of the client. Supported the application to ensure client
