SKILLS

- Oracle Business Intelligence Enterprise Edition 11g
- Microsoft Visio, Excel
- Languages C, C++, Java, SQL, PL/SQL
- Visual Basic 5.0/6.0
- SQL Server 2008/2012, MS Access 2000
- Oracle 10g/11g
- Microsoft SSIS - Design and Implementation
- Microsoft SSRS - Design and Generate Reports
- Orion Rhapsody Integration Engine
- Informatica to SSIS - ETL Spec generation and Conversion
- PostgreSQL, SQL Server Management Studio, SQL Developer, TOAD 11.6.1

EDUCATION

University of South Florida, College of engineering
Tampa, FL • 2014

Master of Science: Electrical Engineering

Jain University, School of Engineering and Technology
Bangalore, India • 2013

Bachelor of Engineering:
Electronics and Communications
Electronics and Communication
Engineering

PROFESSIONAL SUMMARY

- 3+ years of experience in Information Technology which includes experience in Business Requirement Gatherings, Analysis, Design, Data Modeling, Development, ETL Design using SSIS, Testing and Implementation of Data warehouse/Business Intelligence
- Database experience: 3+ years of experience in Oracle 11i/ 10g, MS SQL Server 2005/2000, (database triggers, materialized views, In-line views, Packages, stored procedures, functions, and database constraints), SQL Loader, SQL*Plus, PL/SQL and Oracle DBMS Packages, OBIEE 11g.

WORK HISTORY

Wells Fargo - SQL BI Developer/ETL Developer
Castle Rock, CO • 01/2016 - Current

- Design and implement control flows and functions for SQL Server 2012 and SSIS
- Debug previously implemented SSIS packages and Database objects
- Responsible for providing support to all other development teams with interfacing with all database related objects.
- Coordinated with systems partners to finalize designs and confirm requirements.
- Established compatibility with third party software products by developing program for modification and integration.
- Consistently met deadlines and requirements for all production work orders.

Nexstar Media Group Inc. - SQL Developer/Database Implementer
Charlotte, NC • 01/2015 - 01/2016

- NICE Actimize is a diversified financial services organization who are pioneers in Anti-Money Laundering(AML) solutions and their goal is to Detect, prevent, and investigate money laundering, fraud, and compliance violations with a holistic view of risk across their client organizations.
- Designed and coded procedures and functions for SQL Server 2012 & Oracle 11g to interface between the Actimze AIS/RCM server and the Database.
- Implemented multiple Actimize solutions such as CDD (Customer Due Diligence), WLF (Watch-List Filtering), SAM (Suspicious Activity Measurement) into client environment and interfaced them with respective tables from Application and Profile Database in SQL Server & Oracle 11g.
- Responsible for the development, implementation, documentation, creation of test cases, defect resolution, testing, packaging, delivering code drops and patches to clients for Actimize's debit fraud solution and integrated fraud management platform, resulting in smooth go-live in production.
- Increased the overall efficiency of the project by creating robust code, reusable components and scripts to reduce overhead in future deployments of the product.
- Worked closely with Business Analysts, Solution Architects and Project Managers to extract the information from the previous phase of the project to enhance the solution's capabilities and performance.
- Continued to provide support and have increased customer satisfaction and trust by understanding their issues and providing immediate assistance.
- Established compatibility with third party software products by developing program for modification and integration.

Elutions Inc - SQL Developer
City, STATE • 2014 - 01/2015

- Elutions Inc. is an Energy Bureau Organization that develop conservation algorithms for various load profiles to operate and consume low energy using an Indigenous tool called 'MAESTRO'.
- They Identify and quantify Electrical processes that would help the client save money, through energy savings.
- Responsibilities.
- Coding, Designing and Development using JAVA and SQL Server.
- Created SQL procedures, functions.
- Created and updated tables.
- Migration of databases from one version to the other versions and applying patches.
- Writing Packages for various functional areas.
- Understanding the structure of new tables and transitioning the old queries with new tables.
- Writing SQL.
- Loader scripts to load data from flat files into tables.
- Created and configured multiple instances for development and production environments.
- Using SQL for querying and to diagnose the various operations of the database.
- Creation of new database triggers and modifying the existing ones if necessary.
- Analyzing and debugging SQL queries for performance reasons.
- Prepared detailed Technical Documentation.

Dept. Of Patents And Licensing, USF - Intellectual Property Right Intern
City, STATE • 2014 - 03/2014

- Performing intellectual property evaluation, Prior Arts, market analysis, create marketing slicks, conduct license agreement comparisons.
