Summary

Driven ETL developer with 6 years of professional experience. Researched and implemented 4 data management systems from the ground up. Improved efficiency and reduced bug occurrence by 17% through optimizing data warehousing software, in turn resulting in higher rate of met deadlines. Looking to employ my skillset to elevate PixaDrive on the business analytics market.

Experience

ETL Developer
Enginey, Chicago, IL
April 2019–present
Programmed, developed, and optimized databases daily using Teradata and SQL. Steered team productivity toward a 22% increase in deadline meeting speed. Supervised communication to and between 30+ other technical and non-technical staff members. Stayed on top of all data authentication processes and prepared diligent bi-weekly error reports. Migrated existing data flows for all client accounts, moving away from an obsolete system and decreasing end user waiting times by up to 40%.

Data Engineer
Fareboard, Westerville, OH
November 2014–December 2018
Built new ETL packages using Microsoft SSIS. Served as a MySQL administrator for several external and internal databases. Created auditing plans for over 60 individual vendors to verify month-end market data closing.

Education

MSc in Electronics & Computer Technology
Miami University, Oxford, OH
2013

Skills

- Critical Thinking
- Problem Solving
- Communication
- Teamwork
- SQL
- Teradata
