EXPERIENCE
08/2020 – present

KOVACEK LLC
Entry Level Java Developer

San Francisco, CA

- Experience with Java Development
- An understanding of how to write clean, efficient, well tested code
- A keenness to learn and to work in a highly collaborative environment
- An appreciation that the simple solution to a problem – while often harder to discover than the complex one - is usually best
- Primarily Java 11+, Spring
- Jenkins, Artifactory, Dynatrace, Maven, Docker, Sonarqube
- Openshift, AWS
- Apache Kafka, Kafka streams
- Authoring and reviewing web application code in Angular(Typescript), Java, JavaScript, Spring framework, SQL, etc
- Experience using Atlassian tools, e.g. JIRA, Confluence, BitBucket, SourceTree, etc
- Web application development

10/2013 – 04/2020

BERGSTROM INC
Entry Level Java Developer

San Francisco, CA

- Experience working in an Agile/Scrum/XP environment
- Bachelor's Degree in a technology related discipline (e.g. Computer Science, Information Technology, or Operations Research)
- Must possess strong analytical skills
- Prefer candidates that have the ability to travel up to 50 percent
- Did we already say implementing Modria client configurations? Yes, we are very client facing and work in a fast paced and flexible environment where we are constantly juggling client priorities
- Troubleshooting client issues– we consider these types of operations basic to what we do
- We have a custom workflow engine we built. We want you to learn it, use it, and tell us how we can improve it
- We are always trying to improve our processes. We want you to learn these and then work with us on finding ways to improve them or replace them with better ways to do our work

EDUCATION

DREXEL UNIVERSITY

Bachelor's in Computer Science
