Windows, Linux, macOS

Work History

Sr. React JS Developer
Feb 2020 - Current

7-Eleven   Irving, TX

- Develop high performance customer facing e-commerce application using ReactJS, Redux-saga, React Hooks, React-Router, JavaScript, HTML5, CSS3, SASS, Bootstrap4
- Built custom components for UX-Library consisting Accordion, Filters, Dropdown, Carousel, Button, Checkbox, Input, Icons
- Developed custom API layer to handle all CRUD transactions, JWT token management and implemented interceptors to embed custom headers
- Maintained high-level expertise in React state management strategies, including Redux, Redux Persist and redux-saga
- Exclusively used React-Hooks to perform the application life-cycle processes
- Project was implemented by following TDD using Jest framework for React along with Enzyme test utilities.
- Worked closely with clients to establish specifications and system designs. Used Zeplin and Invision to collaborate with UX
- Used Middleware, Redux-Saga with ImmutableJS in application to retrieve and store data from Back-End and to also perform RESTFUL services.
- Effective use of native HTML elements and custom tags to enhance SEO optimization and application ADA compliance feature
- Implemented CSS Box Model and styled web pages using CSS preprocessor SASS and effectively used mixins, functions, custom grid systems, grid-area concepts and flexbox for a fluid-responsive application
- Expertise usage of GitLab and JIRA as a version control and tracking units.
- Worked in Agile Methodologies for incremental development to deliver better application.

Senior Systems Engineer
Feb 2019 - Feb 2020

Verizon   Irving, TX

- Design dynamic and multi-browser compatible pages using HTML5, CSS3, SASS, Angular 5
- Work extensively with API team to implement creative Chat Bot communication platform from UI perspective
- Closely monitor the usage of Google Dialog Flow Technology and procure the intent-based response to perform intuitive communication feel on User Interface
- Design animated web pages by importing the @angular/animations to enhance customer service chat experience
- Define new validations through AngularJS for the form field validation implemented through HTML5
- Implemented latest Ecmascript6 (ES6) features to enhance code standards and maintainability
- Extensive usage of Gradle & webpack to build Microservices, UI components and pipeline it smoothly for CI/CD using Jenkins
- Translate wireframes into interactive, dynamic code
- Strong knowledge of version control tools like GIT, SVN, Bitbucket
  Build AWS servers by executing Jenkins automated jobs and involve in server maintenance
- Project Technology Stack: HTML5, CSS3, JavaScript, Typescript, Bootstrap, SASS, LESS, Angular, Java, Spring Framework, WebPack, Gradle, Jenkins, Visual Studio, Git Lab

Education

Master of Science: Engineering Management
May 2015

California State University, Northridge   Northridge, CA
