CV

Solution-oriented Java programmer with 8+ years of background in all aspects of the software development life cycle, including analysis and design to execution and maintenance. Proficient with a wide array of tools and programs to build cost-effective yet high-quality systems and applications to increase business productivity and efficiency.

WORK EXPERIENCE

Java Developer   Sep 2018 - Present

Quincy Technologies Limited, Denver

- Use Java, Java EE, Java Bean, and Apache Struts to create automated customer management systems for efficient management of accounts
- Supervise and lead a team of 10 junior developers to complete 16 key company projects within schedule and budget
- Enforce an innovative approach to improve the company's web reporting system, which reduced tracking analysis time by 45%
- Collaborate closely with vendors and management to ensure the full performance and functioning of website database management applications and financial tracking

Back-End Java Developer   Dec 2014 - Sep 2018

Stetson Corporation, Austin

- Improved devices by launching a system with integrated text messaging, navigation, and music playback controlled by voice commands
- Took lead on new project design product definitions, analysis, requirements, and implementation
- Participated in regular development meetings to recommend project improvement and system changes
