PROFESSIONAL SUMMARY

- Over 9 years of experience with SAP in MM-PP & WM functional area with excellent knowledge and experience with SCM modules.
- Over 7+ years of experience in root cause analysis in MM/PP/SD/WM modules.
- Over 7+ years of experience in providing expertise to support functional and technical teams in the resolution of Production clients.
- Over 4 years of experience in large merger and acquisition projects.
- Over 9 years of configuration support in Logistics and Execution (LE).
- Over 4 years of working in MM/PP/WM/SD module.
- Experienced in all phases of ASAP Methodology with a Full Life cycle experience of a project as a team lead right from Business Process, realization, BBC configuration, unit and integration testing, final preparation, training, go-live and post-implementation support.
- Extensive knowledge and hands-on experience in various SAP logistics teams support. Over 4 years of Experience in SAP MM-Master data configuration for Material Master Purchasing.
- Worked extensively on two projects on SDLC and its 7 phases such as Feasibility, Requirement Gathering, Design, Development, Testing, Implementation and Maintenance.
- Assimilated expert in SME level knowledge of SAP MM and PP business experience.
- Extensive experience in SAP Environment in order to set up master data in Enterprise.
- Hands on experience in implementation of RICEFW that are required according to business process, and extensively worked on it as a team lead. Strong communication and creative problem-solver skilled at analyzing business needs and transforming them into technical designs; applying technical skills and business knowledge to achieve sound results.
- Performed Gap analysis, BWFT analysis, Root analysis, and Cost/Benefit analysis.
- Coordinated various technical and managerial teams at all levels and Worked on both Standard and customized SAP-reports for both the business process needs.
- Efficient team leader with excellent overtime management of managerial skills, communications and interpersonal skills, ability to work under strict deadlines.
- Experience in working on long term and large scale projects and supported during the implementation and post implementation of the project. Organized and maintained Material Master Data for various clients for efficient business process implementation.
- Expertise in the Release Procedures creating the customized settings for approvals; by creating the Characteristics, classes, Release indicators, Release strategies, approval strategies and Check release strategies.
- Worked on Material master, Vendor master, purchase info records, purchase orders, purchase requisitions, RFQ, Vendor returns. External service management, Outline agreements, Source lists, Release procedures and MRP-GRP procedures.
- Excellent knowledge of Organization configuration (Plant, Storage Location, purchasing organization, purchasing group, Valuation areas).
- Well versed in Configuration of pricing conditions, Number assignment, Goods, Field Selection, Configuration of New Movement Types and Account assignment.
- Hands on experience in configuration of pricing procedures such as maintain condition tables, define access sequence, and define condition types. Worked on Material and Vendor master data.
- Hands on configuration working experience in QM module. In process inspection, Basic data like defining codegrp, inspection characteristics (MICs), sampling procedures, inspection plan.
- Good experience in SAP Logistics-End user support data management (LSMW).
- Configuration of PP-MRP processes, production orders, process orders, repetitive manufacturing, classification, batch management, capacity planning, demand planning management.
- Good knowledge of PP-PI, Master recipes (PI sheets, Characteristics, Specifications, Capacity planning, Long Term Planning, Sales & operation planning.
- Implemented Warehouse movements in SAP WM-Integration with MM.
- Implemented MTS, MTO, and ETO processes in different SAP projects assignments.
- Having working experience in both Repetitive & Discrete Manufacturing industries.
- Hands on configuration working experience in QM module. In process inspection, Basic data like defining codegrp, inspection characteristics (MICs), sampling procedures, Inspection plan.
- Strong knowledge of end to end supply chain management (SCM) processes.
- Experience in conducting Joint Application Development (JAD) sessions, project meetings and reviews for on-site and offshore teams.
- Excellent experience and extensive knowledge of complete PDP (Procure to Payment) cycle along with Optimized Purchasing, Quota arrangement, Framework order, procurement of External services, Pipeline Materials, Consumable materials, Component and Outline agreements (Contracts/Scheduling Agreements), Consumption Based Planning (CBP), MRP and various Release strategies.
- Experience in Inventory Management (IM) module, with thorough knowledge in configuring Movement types, Goods Receipt, Goods Issue, Stock transfers, Transfer postings, Reservations and in configuring Valuation and Account Assignment categories.
- Worked extensively on two area of PI module with emphasis on Material Valuation, major tables, Automatic account determination.
- Worked on customized output determination, Partner profiles, Text analysis in RFQ.
- Worked closely with various Functional and Technical teams to design the project.
- Well versed in Inventory management with emphasis on Stock management (Quality/Value), Stock transfer Order (STO), Transfer posting and Physical inventory and worked with the Release procedures, subcontracting and Maintenance of BW material (BOM).
- Knowledge in implementation of PP module and its related interfaces with other modules like SD, FICO, MM).
- Hands on experienced and deeply involved Customized Material Master Data.
- Worked with SAP ECC configurations in MM/PP modules such as various inbound/outbound standard custom MM/PP/DOC types, EDI/NET mapping and iWeb/SD transactions.
- Assisted ABAP & developers for M middleware integration using technical, application and non-SAP adapters in last two projects.
- Excellent knowledge of Evaluated Receipt Settlement (ERS) for auto clearance of Invoice and Electronic Data Interchange (EDI) for P/O, GR and IR.
- Having strong ability to use LSMW for data migration to SAP system.

CORE QUALIFICATIONS

- ERP	- SAP SKILL SET
- SAP 4.6B, 4.6B, 4.6C, 4.7	- SAP Materials Management (MM)module
- ECC 5.00, ECC 6.00, Net Weaver XIDM, EDP 6	- Production Planning Control Data (Material & Vendor Master), Account
- Operating System	Determination & Valuation of Material, Inventory
- Windows NT/2000/XP/7, UNIX	Management, Invoice Verification and Material
- Languages	Requirements Planning, Service Master
- C, C++, SQL	- Warehouse Management (WM) Configured
- Database	Module including Storage Bin Management,
- SAP Solution Manager, remedy, ovID, OYBD, puregold, Jperts	Goods Movements, Planning and Monitoring, WF Procedures.
- Office Tools	- Production Planning (PP) including
- Microsoft Visio, Share Point, MS Office (Word, Excel, PowerPoint), Advanced Proficiency in Excel,	Material Master, Bill of Material (BOM), Router Work Center, Production Planning cycle,
- Interfaces	order block for credit, delivery block
- SAP IDocs, EDI Tech. Non-SAP to SAP such as Oracle, Tally, Telco, Informatica Ariabest J.D.F. to	- Quality Management (QM) Quality planning, Basic data for Quality Management Inspection
SAP Validation, Treasury, Manager & Transformation Extender	planning, Quality assurance, Quality inspection.
- SAP Integration: Mid tie FP/XM.SD.LE and SD	

EXPERIENCE

SENIOR ASSOCIATE SAP MM-PP CONSULTANT
Deloitte, Wichita, KS   01/2015 to CURRENT

- Implementation and Support.
- **SAP E.C.C 6.0**
- **Integration: MM-PP,WM,SD and FI**
- Involved extensively in full-cycle implementation of Materials Management and Production Planning module and post implementation support.
- Participated in the AS-IS study, design of the "TO BE", preparation of 'Gap Analysis' and Blueprinting for Enterprise structure.
- Involved in all phases of ASAP implementation, user training and post-implementation operational support provided and linked master issues during and after the implementation.
- Operational support provided, designed cross team analysis for RICEF objects.
- Worked on an step data conversion and migration.
- Developed data dictionary objects custom WM and PP tables, views, search helps, table maintenance generator using Events, Indexes.
- Performed gap analysis and created the solution to solve detailed and users and User Acceptance Testing to validate the business scenarios.
- Resolving issues which raised through ticketing system (BMC Remedy & HP Manager 9) based on their priority such as P1, P2, P4 tickets.
- Handling and resolving day-to-day issues on MM Procurement, Purchasing, Inventory Management validation with business scenarios.
- Attending SAP L1 support tickets on SAP Purchasing and SAP Inventory Management modules. Coordinate with SAP Technical team on modifications to forms and reports Business process mapping with SAP for key roles.
- Extensive knowledge of CRM and its functionality.
- Configured the Material Master with Classification and the various Master data such as info record, Source List, Quota Arrangement.
- Extensively worked on the configuration of Materials Management Module for complete procure to pay (P2P) cycle.
- Executed Purchasing functions such as Purchase Requisition (PR), Quotation, Purchase order (PO), Subcontracting processes, Quota arrangement, Release strategy, approval strategy and Output Determination.
- Configuring and resolving issues related to Inventory Management (IM), Process Including Goods Receipt, Damaged Goods/Discrepancy, Goods Receipt from Production, Material conversion, Storage Location to Storage Location transfer, Physical to Physical movement in IM.
- Worked extensively and having hands on knowledge in Stock Transfer Order including Plant-Plant, Intercompany and Intra-company.
- Defined and configured STO from Sales and Distribution (SD) point of view. Defined and configured STO from Material Management point of view.
- Defined various Goods movement types such as inter-plant stock transfer, Transfer postings, and Material to material transfer.
- Worked on experience in logistics and execution (LE) such as of shipping and LE warehouse management.
- Worked on special procurement such as Cross Plant Planning for External Procurement Material in MRP with their Stock Worked in discrete manufacturing, production process industry (PP-PI) and repetitive manufacturing environment.
- Posting inventory in PP cycle; keep inventory (B) such as consumables.
- Involved in Configuration of PP-MRP processes, production orders, process orders, repetitive manufacturing, classification, batch management, capacity planning, and demand planning management.
- Working extensively in PP cycle, keep manufacturing(MPS), leverages and consumer good product (BCG) industry experience in Inventory and pull Store, configuration and movement types.
- Expertise in PP-PI cycle in broad point of view such as sales and operations planning, demand management planning, MRP setup floor control.
- Worked extensively on change management in order to include existing procurement elements such as production orders, purchase orders, purchase requisitions.
- Worked on master data configuration of Materials Master, BOM, Work Center, Routing, Configuration of PP and PP-PI modules.
- Implemented all functionality of Variant Configuration related to Production Planning, Purchasing, Sales and distribution. Worked as team lead with various Order types and object stock transfer.
- Developed implementation plans for the SAP modules PP and PP-implemented Material Valiant, Object dependencies, Variant Table, Functions, Variant Pricing, Order BOM and also managed implementation of PP and PP-PI design on SAP 6.0 release.
- Worked on MTO, MTS & ETO scenarios.
- Material master setup related to PP- Super Bill of Materials/ BOM & Super Routing/ routing SAP MRP scheduling and Capacity Requirement Planning & capacity leveling. Production order execution.
- Maintained Bills of Materials (BOMs) for Finished Materials and Semi-Finished Materials as per requirement.
- Implemented Inventory Management activities such as GR/GI, Goods movements, Transfer Postings, and maintenance of Non-valuated stock.
- Configured Release Strategies for various purchasing documents as per the business requirements such as approval matrix.
- Worked with FI team for setting up Automatic account determination and parameters for invoice verification like Price variances, customizing tables, invoice blocks, Tolerance limits, invoice reduction, and creation of Subsequent Credit/Debit accounts.
- Worked with supplier chain management (SCM) teams, involved in demand planning to inventory management.
- Implemented and supported Invoice verification cycle against PO, for Consignment, and for procurement of External Services in coordination with FI team.
- Developed ever 50 reports and modified existing reports using Function Modules and Methods exclusively in MM module to Batch Input and Warehouse stock status reports.
- Specialized in writing design documents. Worked on Electronic Data Interchange (EDI) complete processes, Such as inbound process, outbound process.
- Involved in Electronic data Interchange (EDI) for sales and order uploaded using LSMW.
- Worked with Technical team for configuring Output determination for different partners.
- Performed detailed Unit testing, Validated input data in excel by different tables.
- Involved in complete Phase on end to end interface for different scenarios.Provided manual for End User Training.
- Given the End user training, prepared user manual and provided post Go-live support

SR. SAP ASSOCIATE SAP MM-PP CONSULTANT
Walmart / City, STATE   07/2013 to 2015

- Implementation and Support.
- **SAP E.C.C 6.0**
- Involved in full cycle implementation and resolved the post implementation issues.
- Worked extensively on ASAP methodology.
- Performed data conversion as lead in order to set up master data in ECC and worked with base team to perform the process.
- Good experience in working environment of complete Material Management configurations skills, testing and implementations and rollout experience. Worked on providing ongoing support for the module.
- Resolved P2, P3, P4 level tickets in timely manner and approached.
- Performed day-to-day support for all Plant-based WM module, worked on custom tables.
- Tested features across various browsers.
- Filed bugs as they were encountered.
- Developed training materials and procedures.
- Provided recommendations for resolving defects.
- Analyzed and created new configuration for packaged software to meet business and system requirements.
- Actively supported operational improvements to enterprise quality management process.
- Maintained proper stock levels on a line.
- Developed production tracking and quality control systems, analyzing production, quality control, maintenance and other operational reports, to detect production problems.
- Reduced production defects by evaluating product and non-effective production methods were improved.
- Monitored and adjusted production processes or equipment for quality and productivity and monitored the production processes and adjusted schedules as needed.
- Assisted Configuration and Production process as helped corrections, and Plant, Storage locations, Valuation areas, and purchasing organization and Purchasing groups as the Enterprise structure in the Client's specifications.
- Defined and created Material types attributes, Maintain class, purchasing documents, and field selection group, and assigned the number range as per the business requirements.
- Implemented Split valuation of material such as company code as per business requirements.
- Implemented Subcontracting process in which the components such as raw material materials, packing materials, etc. required to manufacturing a product are supplied to the vendor, who processes them to deliver the product.
- Implemented Consignment process on which the product is procured and stored in Premises that belongs to the vendor. The liability starts only when the goods are consumed.
- Implemented Pipeline process in which a material is procured and consumed as and when required through a pipe such as water, electricity etc.
- Hands on experience in customizing the pricing procedure, access, condition types, access sequence in MM Pricing.
- Implemented Material changes to the production order such as read master data and use of warranty orders in Change management.
- Configured various Release strategies implemented Physical Inventory and Batch determination strategy.
- Configured Plant Parameters; worked on Configuration of MRP, planning strategies, lot size procedures.
- Configured Production Scheduling profile for order control and worked with the base team.
- Worked on tech transfer related activities. Designed and tested in the area of transferring various technical master data, BP Scenario, FI CO, and Inventory Management.
- Involved in Unit testing, Integration Testing and User Acceptance testing.
- Implemented PP-PI and complete Manufacturing processes in-depth Lead team & PP consultant for the three complete SAP implementation. Worked through Material Management and Production Planning activities.
- Worked with vendor, Designed and tested in the area of transferring in-depth Lead team & management.
- Performed configurations of LE Shipping, LE-WM and LE-Short term delivery.
- Performed STO process completely from MM and SD point of view.
- Hands on experience in configuration, implementation and resolving issues of Consumption Based Planning (CBP) and MRP.
- Assisted implementing PP-PI module and its related interfaces with other modules (SD, FI/CO, MM, and PP).
- Implemented MTS scenario for auto component manufacturing facility and worked on it.
- Configured customized various reports for Inventory management such as stock overview, list of material document, maintain order types, material on hand etc. in IM.
- Extensively worked with data migration techniques LSMW and implemented it.
- Implemented MTO scenario on which each sales order creates its own independent requirement in order to fulfil the requirement.
- Configured various Release strategies implemented Physical Inventory and Batch determination process in inventory management.
- Defined Tolerance limit to Invoice verification, posting blocked invoice and stochastic block.
- Implemented and tested Evaluated Receipt Settlement (ERS) process.
- Configured Automatic account determination to valuation of materials generation, MM and PP modules.
- Records assisted in implementing PP and complete manufacturing processes in-depth as a lead team & PP consultant for the three complete SAP implementation.
- Defined, designed and tested in the area of transferring various technical master data, functional master freight, rate charge for transportation.

SR. SAP MM-PP CONSULTANT
Kadeya Corporation / City, STATE   07/2011 to 06/2013

- Implementation and Support.
- **SAP ECC 6.0**
- **Integration: MM to FI/CO and SD**
- Involved in ECC Upgrade, implementation and post implementation support
- Implemented Complete ASAP Methodology.
- Identified RICEFTs that are needed according to business process.
- Defined and Acquired System Application Requirement from Business part of view.
- Translated business requirements to Technical specifications.
- Defined requirements and translated into functional specification and business designs.
- Served as mentor to junior team members.
- Provided expertise and business part case to workflow team.
- Collected the business process information about the Purchasing Cycle, Inventory Management and Stock Transfer.
- Mapped and customized Purchasing functions such as Purchase Requisition (PR), Quotation (RFQ), Purchase Order (PO), Subcontracting process, Quota arrangement, Release strategy, Output Determination.
- Maintained various customizing setups and master data in Material Management.
- Worked with functional specialist, prepared technical specifications and liaised with other teams.
- Performed Setting up the Consumption Based Planning and Price determination in sequence to scale requirement.
- Involved in complete Inventory cycle including Goods receipt, Goods Issue, Physical Inventory, Reservation, Stock transfer and Transfer posting process in inventory management.
- Configured Automatic account determination to valuation of material and its related settings.
- Implemented Release strategy for different purchasing documents (PR, PO, RFQ, Contract, Scheduling Agreement) using characteristics, class and release procedure.
- Worked in areas of Batch Management, Special Procurement, External Service Management, such as subcontracting, Consignment, Stock transport order, inter & intra company STO.
- Created various Outline Agreements such as Contracts and Scheduling Agreements.
- Defined Release procedure for purchase requisition and external purchasing documents.
- Implemented various MRP procedures with related customizing as required by client.
- Configured PP-PI process, created Master recipe, resources, and production version.
- Configured BOM, work center, routing, order types etc. in Production Planning module.
- Performed the procurement of materials from one plant to another using Stock Transport Order.
- Implemented the entire Inventory management cycle; worked on the goods movement types.
- Configured various Release procedures including characteristics, class, and release strategy.
- Implemented MM-FI integration, and configured Automatic account determination including valuation class, account category reference, valuation grouping code, account modifier etc.
- Customized and implemented MM-SD Integration.
- Designed Functional Specification documents for various RICEF objects.
- Extensively worked on LSMW for data migration.

Glass Smith Alina Pharmaceutical Ltd. / City, India   2010 to 06/2011

- Implementation and Support.
- Configured General Setting and created Organizational structure, assigned and maintained Plant, Purchasing Organization, Storage Location, Purchasing Group.
- Defined and Assigned Purchasing Organization to company code and Plant.
- Customized Material Master and Vendor Master, Purchasing Info Records.
- Customized Number ranges for Material Master, Vendor Master, Purchase document types.
- Configured Purchasing documents such as purchase requisition, request for quotation, purchase order, contract, scheduling agreement.
- Configured Release procedure for various purchasing documents.
- Worked on the Inventory management cycle including Goods Receipt, Goods Issue, Physical Inventory, stock transfer, Transfer posting, reservation process.
- Configured Movement types, valuation and account assignment.
- Implemented Automatic account determination.
- Configured Split valuation for material.
- Configured various pricing procedures and conditions.
- Implemented Batch Management and worked on batch determination.
- Worked on special procurement processes such as subcontracting, consignment, stock transfer.
- Configured Invoice verification process including planned and unplanned delivery cost.
- Worked on LSMW for data migration.

Hyundai Motor India Ltd / City, India   2007 to 2010

- Collected the business requirements.
- Configured Enterprise structure and Organization Structure and Business process.
- Modified screen layouts for material master. Material types.
- Customized Material master, Purchasing info records.
- Defined and Configured the Procurement cycle.
- Configured purchasing documents and release procedure.
- Implemented Inventory management cycle.
- Worked on MRP procedures and processes.
- Worked on LSMW for data migration.
