WORK EXPERIENCE

Java Developer
ClearWater Cloud Systems & Technologies

04/2015 – Present   *Orlando, FL*

- Utilize Java, Enterprise Java Bean, Java EE, and Apache Struts Web applications to develop fully automated client management systems for the efficient maintenance of client accounts.
- Enforce an innovative approach to improve the client's web reporting system, which effectively reduced the financial tracking analysis time by 50%.
- Supervise and lead a team of 10+ junior java developers to ascertain the successful completion of the 13 key projects of the company within budget and schedule.
- Collaborate closely with the management, vendors, and associated third parties to guarantee the full functionality and performance of the website financial transactions and database management applications.
- Oversee all phases of the development of the new Java-based vendor application system for the financial services industry, from conceptualization and design to progress and deployment.

Back-End Java Developer
Easy Stream International

02/2011 – 03/2015   *Tampa, FL*

- Took part in the scheduled development meeting to recommend relevant system modifications and project improvements.
- Spearheaded the software product definition, requirements, analysis, and implementation for the new project designs.
- Innovated the phone devices by deploying a system that integrated navigation, text messaging, and music playback via an easy-to-use and low cognitive load interface that is controlled by voice commands.

Assistant Systems Engineer
SwipeWire Inc.

01/2008 – 01/2011   *Tampa, FL*

- Aided in overseeing the transition of the commerce API to microservices that are running on a dockerized platform and ECS through other Amazon Web Services (AWS) such as Dynamo, SQS, and ElastiCache Redis.
- Coordinated with the experienced Sytems Engineer and other professionals in the team in migrating the cost-efficient service that successfully reduced the operating costs by over 70% upon running the newly migrated service.
- Provided expert support in developing and implementing effective technical solutions that enhanced the system's performance and subsequently boosted business efficiency.
