WORK HISTORY

09/2006 to 04/2008 **SAP BW support**
Vizient – Columbus

- SAP BW Certified professional. Certification ID:0003827547 (Jan 13, 2006).
- I have been trained in SAP BW and SAP R/3 (FI/CO and SD). Trained in Data Modeling of BW, Administration Workbench, BW objects, Extraction.
- Worked extensively on BEx Analyzer. Created queries using BW-Reporting Variables, Free Characteristics, navigational attributes, Filters and also on Multi Cubes.
- Used RRI interfaces, conditions, and Exception handling through SAP Mail, batch printing and alert monitor.
- Designed developed and modified Info Objects, Info Cubes, ODS Objects, Info Sources, Transfer rules, Update rules to suit the business requirements.
- Populated the Info Objects, ODS Objects and Info Cubes with Master data and Transactional data from SAP R/3 via Data Staging area (PSA) by creating Info Packages.
- Extensively used BW standard business content extractors to extract data from SAP R/3 to BW.
- Build Multicubes to develop critical reporting needs of the client. Used aggregates to improve the query performance.
- Created Generic Data Sources using database Views on Tables and InfoSet Queries. Managed and monitored several data loads.
- Optimized load performance by adjusting the packet sizes and resolved the errors and inconsistencies during the data loads.
- Developed strategies for nightly/weekly/monthly production data loads using Info package groups, events and scheduler using administrator work bench.

11/2003 to 08/2004 **Software Engineer**
Wipro – City

- Involved in the requirement collection, design, development and implementation of Account level intranet website on Java and Oracle as backend.
- Involved in some key projects on Cold fusion and SQL server for a leading CPG client, Wherein I did screen design and development.
- I was trained on the usage of testing,design and performance tuning tools like, C++ Parasoft Test Tool, Rational Rose and TOAD.
