Extensively worked on n-tier architecture systems with application system development using Core Java, JDBC, Servlets, JSP, EJB, JMS, Web services, Restful Web Services, Spring, Spring boot, Struts MVC, JSF, Hibernate.

SKILLS

J2EE Technologies Servlets, JSP, Struts, EJB, JDBC, JNDI, JMS, RMI, JAXB, JAX-WS, CXF. Framework Spring, Struts, Hibernate 3.0/4.x, Junit

WORK EXPERIENCE

Junior Java Developer/Systems Engineer

ABC Corporation - 2015 – Present

- Involved in requirements gathering, analysis and design and documentation as the application was started from scratch.
- Developed various j2ee components like servlets, JSP, JSTL, Ajax, SAX, XSLT, JAXP, JNDI, LDAP, JMS, and MQ series by using rad.
- Used Struts/MVC framework to enable the interactions between JSP/View layer and implemented different design patterns with J2EE.
- Implemented business layer using core java, spring beans using dependency injection, spring annotations, spring web-flow components.
- Implemented agent-server messaging dialog using camel and JMS (active MQ implementation).
- Set up a Jenkins server and build jobs to provide automated builds based on polling the git source control system.
- Developed custom solutions that act upon Jenkins information in real-time.

Java Developer (Contractor)

ABC Corporation - March 2010 – April 2011

- Involved in handling coding, testing and integration and quality assurance activities.
- Performed event-driven asynchronous io using Node.Js, developed screens using JSP, struts.
- Performed unit testing using JUnit test cases to test the behavior of the coded classes.
- Provided development support for system integration testing and user acceptance testing.
- Lead the team toward crafting new user experiences that exceed customer expectations
- Suggested areas for improvement in internal processes along with possible solutions.
- This is Dummy Description data, Replace with job description relevant to your current role.
